Dear Hiring Manager,

I am writing to express my interest in a senior program or transformation leadership role within your organization. With over 17 years of experience leading enterprise Salesforce and digital transformation programs across life sciences, healthcare, and retail domains, I bring deep expertise in regulated environments, global portfolio governance, and large-scale delivery execution.

In my current role at **Biogen**, I lead the end-to-end delivery of a multi-million-dollar Patient 360 transformation program supporting therapy services across the United States. The initiative integrates therapy support, access and benefits management, logistics, order workflows, and risk capture processes through Salesforce Health Cloud and downstream healthcare systems. I govern a cross-functional organization of over 100 members operating under SAFe, strengthening release predictability, risk management, and portfolio alignment within a highly regulated healthcare landscape.

Previously at **Wipro and LTI Mindtree**, I directed enterprise Salesforce transformations across Sales Cloud, Service Cloud, and AI-enabled platforms. My work has included large-scale legacy modernization, EU multilingual rollouts, contact center transformation, and operational excellence programs delivering measurable efficiency gains and improved adoption. Across engagements, I have consistently focused on structured governance, stakeholder alignment, and KPI-driven execution to ensure business outcomes and regulatory compliance.

My leadership approach combines architectural strategy with disciplined program governance, enabling scalable, patient-centric platforms and global delivery models. I am particularly motivated by Germany's strong focus on engineering quality, healthcare innovation, and regulatory excellence. With beginner-level German (A1) and a clear relocation intent, I am committed to integrating effectively within cross-cultural teams and contributing long-term value.

I would welcome the opportunity to discuss how my experience in Salesforce-led digital transformation and regulated healthcare programs can support your strategic objectives.

Thank you for your consideration.

Yours sincerely,

Rajib Ghosh
