Summary

Quality- and results-driven Embedded Systems Software Engineer with 10+ years of experience delivering safety- critical software for automotive ECUs. Proven expertise in system feature ownership, embedded C development, validation, and ISO 26262 functional safety compliance. Strong track record of structured problem solving and supporting successful SOPs for global OEMs through effective cross-functional collaboration.

Core Skills

- **Embedded & Automotive:** Embedded C, C++ Fundamentals, Automotive ECUs, Hydraulic Braking Systems
- **Functional Safety:** ISO 26262 (Level 1), V-Model SDLC, MISRA C Compliance
- **Verification & Validation:** MIL, SIL, HIL, Integration Testing
- **Configuration & Lifecycle Management:** Git, PTC Integrity (MKS), IBM ELM / DOORS Next Gen, SDOM eASEE
- **Development & Test Tools:** MATLAB/Simulink, Polyspace, INCA, CANalyzer, UDE, TPT, LabCar
- **Engineering Methods :** Change & Impact Analysis , Root Cause Analysis, Peer Reviews, Feature Maturity Planning

Experience

Continental Automotive Systems (Shanghai) Co. Ltd.

August 2024 – May 2025

Senior System Engineer

Shanghai, China

- Owned Actuator Driver Controlled Braking (ACT_DBRK) and Electronically Controlled Braking (ACT_EBRK) features at system level for MKC2 one-box braking platform.
- Directed and coordinated feature-related development activities.
- Defined release-wise test scope in line with SML, supported prioritization & optimization of test execution.
- Led root cause analysis (RCA) for issues reported by vehicle testing teams and OEMs, by collaborating effectively across cross-functional teams.
- Conducted pre-release quality assurance checks and approved features for release readiness.

Continental Automotive Components (India) Pvt. Ltd.

September 2018 – July 2024

Technical Architect

Bengaluru, India

- Responsible for customer-project support of software components covering arbitration, system state management, monitoring and self-test functions, hydraulic actuator control, and production support services, focusing on debugging, functional enhancements implementation using Embedded C/Matlab- Simulink, and query resolution.
- Configured software based on system definitions at project start and executed standard tests to validate configurations.
- Analyzed issues reported by vehicle testing teams and OEMs, and proposed effective technical solutions collaborating closely with the platform development team.
- Conducted pre-release quality assurance checks and approved software components release readiness.
- Supported MK100 and MKC1 braking system platform customer project for European OEMs BMW, VW, Maserati, Volvo, Ford.
- Supported MK120 and MKC2 braking system platform customer project for Chinese OEMs CHANGAN, CHERY, SAIC, DONGFENG, LEAP MOTOR and GEELY.
- Recognized by China region leadership for technical excellence during Changan MK120 pilot launch.
- Played a key role in establishing the China Customer Project Team in India, serving on the hiring panel, mentoring newly onboarded junior engineers, and successfully supporting 50+ projects through SOP (Start of Production) across four products: MK100 & MK120 (two-box) and MKC1 & MKC2 (one-box).

Robert Bosch Engineering and Business Solutions Pvt. Ltd.

August 2014 – September 2018

Senior Software Engineer

Bengaluru, India

- Designed and delivered supplier-specific diagnostic Interface module for Euro 6D powertrain ECUs.
- Developed Simulink-based Interfacing modules and verified functionality using TPT
- Integrated Renault customer requirements by combining provided code packages, OS and NVMY configurations. Validated integrated requirements through LabCar testing.
- Managed software delivery by performing Basic functionality tests, resource measurements, re-programming tests, and preparing detailed reports for client submission.
- Delivered defect-free software on schedule, earning client commendations and on-site selection.

Education

RNS Institute of Technology

2010 – 2014

Bachelor of Engineering in Electronics & Communication

Bengaluru, India

Certifications

- ISO 26262 Level 1 Functional Safety Certification Program (FSCP), 2023

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Proficiency (B1)
