Summary

Senior Frontend Engineer with 7+ years of experience delivering scalable enterprise web applications using React, Angular, and modern JavaScript frameworks. Strong expertise in performance optimization, REST API integration, reusable component architecture, and responsive design. Actively leverage Generative AI tools including GitHub Copilot to accelerate development, improve code quality, and enhance defect detection through AI-assisted coding and review workflows. Proven track record supporting telecom and financial services platforms with focus on clean architecture, automation, and measurable user experience improvements.

Core Skills

- **Programming & Frontend Technologies:** JavaScript, TypeScript, HTML5, CSS3, React 16.8+, Next.js, Angular 16, SCSS, Tailwind
- **Architecture & Integration:** REST API Integrations, Micro Frontends, Responsive Web Design, Semantic HTML Best Practices, WCAG 2.1
- **Agile Delivery & Collaboration:** Agile/Scrum, Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, Cross-Functional Collaboration, Client Communication (US Stakeholders), Technical Guidance
- **Cloud, DevOps & Tools:** AWS (Lightsail, Amplify – React component hosting & deployment), CI/CD, Git, JIRA, Bitbucket, Postman, Figma, Jenkins, Azure DevOps
- **AI Tools & Productivity:** GitHub Copilot, AI-assisted Code Generation, Prompt Engineering for Development Workflows
- **Performance & Professional Excellence:** Responsive UI Optimization, Clean Code Practices, Documentation, Sprint Demos, Mentoring Junior Developers, Time Management, Task Prioritization, Knowledge Sharing

Experience

AT & T Communications Services

March 2024 - Present

Analyst

India

- Develop Angular and Next.js components enabling complex enterprise user journeys across multiple wireline services.
- Optimize frontend performance through code splitting, CSS and JS minimization, and API response tuning improving load speed by 30-40%.
- Leverage GitHub Copilot and AI-assisted code reviews to reduce boilerplate development time by 25% and identify 30% more UI defects during early grooming cycles.
- Refactor shared component library reducing duplication by 35% and improving maintainability.
- Implement responsive UI standards ensuring consistent cross device behavior.
- Incorporate AI assistants into daily React and Angular sprint workflows improving development velocity and enhancing overall code quality metrics.

Accenture

April 2021 - March 2024

Senior Software Engineer

India

- Develop reusable React components for broadband plan management and customer onboarding, integrating real-time REST APIs to ensure seamless data exchange across backend systems.
- Design responsive and performance-optimized UI workflows using React and modern JavaScript, improving page load time by 50% through lazy loading and image compression techniques.
- Contribute to end-to-end solution architecture, defining API specifications and implementing structured error-handling strategies to enhance system reliability.
- Improve user experience through interface redesign and usability enhancements, increasing customer satisfaction to 90%.
- Gain hands-on exposure to AWS, supporting cloud-based integrations within broadband workflows.

Tata Consultancy Services

November 2018 - April 2021

Frontend Developer

India

- Lead migration of legacy Angular application to React (v16.8), redesigning component architecture to improve maintainability, scalability, and long-term code stability.
- Develop customizable investment dashboards enabling users to track, compare, and analyze mutual fund performance through dynamic data visualization components.
- Increase user engagement by 30% by implementing personalized fund display logic and interactive UI enhancements.
- Improve application performance by 35% through React optimization techniques including memoization and reduction of unnecessary re-renders.
- Collaborate with backend and product teams to integrate REST APIs and deliver responsive, cross-browser compatible financial reporting interfaces.

Education

Guru Nanak Dev University

August 2014 - May 2018

Bachelor of Technology - Computer Science and Engineering

Amritsar, India

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Proficiency (B1)
