Dear Hiring Manager,

I am writing to express my interest in the Program Manager position. With over five years of experience across India and Germany in e-commerce operations, revenue growth, and program execution, I bring a structured, data-driven approach to scaling operations and delivering measurable business impact.

In my current role at Flipkart, I lead large-scale seller operations initiatives focused on revenue expansion and cost optimization. I successfully scaled the dropship charter, increasing seller contribution from 2% to 13% of total orders (180% YoY growth). By mentoring a team of 121 seller support agents and implementing structured contact reduction strategies, I reduced monthly contacts from approximately 300,000 to 87,000 while sustaining operational stability below 20,000 contacts. Additionally, I led category growth and cost optimization initiatives, reducing Cost of Doing Business (CODB) and Cost to Unit (CTU), strengthening long-term profitability.

Previously, during my tenure in Berlin with Gorillas Internet GmbH and Cold & Dog GmbH, I gained hands-on experience in European operational standards, lean implementation, and end-to-end lifecycle management. I improved customer satisfaction by optimizing delivery timelines and introducing a structured TOA process for delayed deliveries, contributing to improved retention and repeat business. Working in Germany enhanced my understanding of structured execution, stakeholder alignment, and disciplined process management in a highly competitive market.

I am proficient in Advanced Excel, Google Analytics, BI tools, and SQL, enabling me to translate complex data into actionable strategic decisions. My Lean Six Sigma Green Belt certification further supports my ability to drive continuous improvement and operational excellence. With professional working proficiency in German (B1), I am confident in integrating effectively into German business environments.

I am motivated to contribute to an organization that values structured growth, operational discipline, and measurable impact. I would welcome the opportunity to discuss how my cross-market experience and data-driven leadership can support your strategic objectives.

Thank you for your time and consideration.

Sincerely,

Arpan Sinha
