Dear Hiring Team,

I am writing to express my interest in suitable opportunities in **Production Planning, PPC, Material Planning, or Supply Chain Planning** within your organization. With more than 15 years of experience in engineered-to-order manufacturing and heavy fabrication, I bring strong expertise in production planning, MRP, inventory control, supplier scheduling, and delivery-focused execution.

In my recent roles, I have led end-to-end planning activities including schedule development, shortage analysis, supplier follow-up, material availability control, and cross-functional coordination across production, purchase, stores, quality, and engineering. I work hands-on with **SAP ECC (PP/MM), Primavera P6, MS Project, and Excel-based MIS** to convert demand into executable plans and maintain control from order release to dispatch.

At **Integra Engineering**, I developed **L1-L3 schedules** and improved supplier commitment tracking, contributing to a **15-20% improvement** in material availability. At ISGEC Heavy Engineering, I prepared baseline and recovery schedules for EPC and material handling projects and supported faster dispatch readiness and inspection closure through structured reviews and issue escalation. In my current role at Anupam Industries, I help strengthen execution discipline across fabrication, machining, and assembly through KPI tracking, root cause analysis, corrective action follow-up, and close coordination with cross-functional teams.

I believe my background in planning, execution control, supplier coordination, and continuous improvement can support your organization in improving schedule reliability, material readiness, and delivery performance. I am open to relocating to Germany and would welcome the opportunity to contribute to your manufacturing and supply chain objectives.

Thank you for your time and consideration.

Sincerely,

Samirkumar J. Fumakiya
