Dear Hiring Manager,

I am writing to express my interest in the **Technical CRM / Marketing Automation Consultant** position within your organization. With over five years of experience designing and implementing omnichannel CRM ecosystems across insurance and ecommerce enterprises, I bring a strong combination of marketing automation strategy, technical integration expertise, and data-driven performance optimization.

In my current role as **Senior Associate at DWAO**, I design and execute enterprise-level CRM programs across Email, SMS, Push, WhatsApp, and RCS channels using CleverTap, Adobe Campaign, Netcore, and MoEngage. Beyond campaign execution, I lead event tracking architecture design, configure REST-based integrations, and ensure reliable bidirectional data synchronization between CRM platforms and backend systems. I also manage integration validation, resolve API-level failures, and coordinate controlled production releases to maintain system stability and data accuracy.

For a **leading insurance enterprise**, I established scalable CRM infrastructure including automation workflows, personalization logic, event-based segmentation, and performance reporting frameworks. By combining behavioral data analysis with structured A/B testing, I increased campaign engagement by 25% and improved conversion rates by 18%. Additionally, I transformed engagement datasets into actionable insights to support sales prioritization and lead qualification strategies.

My background in QA and data validation further strengthens my technical foundation. I have supported structured data migrations, executed UAT cycles, and implemented governance controls to reduce post-deployment defects and ensure compliance with regulatory standards.

I am particularly motivated to contribute to organizations in Germany that value structured engineering practices, data governance, and scalable digital customer engagement. With B1-level German proficiency and full professional English fluency, I am committed to integrating quickly into cross-functional international teams and contributing to long-term organizational growth.

I would welcome the opportunity to further discuss how my technical CRM expertise and integration experience can support your digital transformation initiatives.

Thank you for your time and consideration.

Kind regards,

**Pabbaraju Ramya Sree**
