Dear Hiring Manager,

I am writing to express my interest in hospital pharmacist roles in Germany, particularly in inpatient and outpatient hospital pharmacy. With over 7 years of experience across teaching and specialty hospitals, I bring a strong track record in medication safety, stock control and high-volume dispensing that aligns well with clinical pharmacy expectations in German Krankenhausapotheken.

In my current role as **Hospital Pharmacist at Chandigarh University Teaching Hospital**, I deliver safe dispensing for 150+ inpatient and outpatient prescriptions per shift across multiple departments. Each prescription goes through checks for dose, frequency, interactions and allergy history, with particular attention to high-risk and LASA medicines. Daily work includes IV fluid preparation, counselling patients and caregivers on correct use and adherence, and ensuring clear communication with physicians and nursing teams to support safe and efficient treatment pathways.

Previous positions at Healthsure Hospital and Motherhood Hospital strengthened my skills in stock management, controlled drug handling and audit-ready documentation. I manage expiry and near-expiry control using FIFO, monitor cold chain for vaccines and other sensitive products, and coordinate with suppliers to maintain availability without overstocking. These routines reduced expiry-related write-offs and supported smooth internal and external inspections. Colleagues rely on me to reconcile cash and electronic billing accurately and to train new team members on pharmacy workflows, SOPs and customer-focused service.

Germany's emphasis on structured processes, quality management and patient safety strongly matches the way I work. I use Microsoft Word and Excel for logs and reports and feel comfortable adapting to hospital information and pharmacy systems used in Germany. I currently hold C1-level proficiency in English and B1-level German and continue progressing toward higher German levels to communicate effectively with patients, medical staff and insurance stakeholders. I am ready to follow all regulatory steps for recognition and Approbation and to integrate quickly into multidisciplinary hospital teams.

I would welcome the opportunity to discuss how my hospital pharmacy experience, medication management skills and commitment to safe, efficient care can support your clinical and operational goals in Germany.

Sincerely,
Himanshi Kaushal
