Dear Hiring Manager,

I am writing to express my interest in the **Business Analyst** position within your organization. With five years of experience in enterprise IT and regulatory reporting environments, I bring strong expertise in requirements engineering, data analysis, and structured UAT governance across data transformation initiatives.

In my previous role as **Business Analyst at Arcane Software**, I analyzed and translated business requirements into functional specifications, use case models, and process workflows to support development teams. I facilitated stakeholder workshops to define data sourcing attributes, validation rules, and acceptance criteria, ensuring alignment between business expectations and technical implementation. I also supported functional, regression, and user acceptance testing cycles, managing the complete defect lifecycle and improving requirement clarification efficiency by 20 percent through structured documentation practices.

Earlier, at **HP Global Soft Pvt Ltd**, I worked as a **Technical Business Analyst** within a regulatory reporting environment. I conducted structured requirements workshops, developed BRD, FSD, and TSD documentation, and performed data mapping activities aligned with Informatica PowerCenter ETL logic. By coordinating UAT cycles and defect triage processes within a cross-functional team, I contributed to achieving 95 percent defect resolution before production deployment, ensuring stable and compliant regulatory submissions.

My technical foundation in **SQL, RDBMS concepts, and ETL** mapping enables me to effectively bridge business and technical teams. With experience in both Agile Scrum and Waterfall delivery models, I am comfortable operating in structured enterprise environments. I hold a Bachelor of Engineering in Computer Science and have German language proficiency at B1 level. I am fully prepared to relocate to Germany and integrate into multicultural project teams.

I would welcome the opportunity to contribute my analytical expertise, documentation rigor, and stakeholder coordination skills to your organization. Thank you for your time and consideration. I look forward to the opportunity to discuss my application further.

Sincerely,
Aishwarya H
