Summary

Engineering Manager with 10+ years of experience leading high-performing teams and architecting scalable E-Commerce and SaaS platforms for global markets. Strong expertise in Micro Frontend architecture, Design Systems, and React and Next.js ecosystems supporting enterprise scale applications. Proven ability to drive technical strategy, mentor engineers, and deliver mission critical infrastructure that improves developer productivity and platform reliability. Experienced in cross functional collaboration, agile delivery, and building engineering culture focused on quality and performance.

Core Skills

- **Engineering Leadership:** Engineering Management, Technical Strategy, Mentorship, Performance Management, Agile Delivery, SDLC Governance, ADRs
- **Frontend Platforms:** React, Next.js, TypeScript, Redux, SDK Development
- **Backend & Data:** Node.js, GraphQL, REST APIs, SQL, Python, PostgreSQL, MongoDB
- **DevOps & Platform Engineering:** CI/CD, Docker, Vercel, Webpack, Sonatype, Coverity
- **Quality & Observability:** Jest, React Testing Library, Sentry, Observability, Performance Monitoring
- **Architecture & System Design:** System Design, Microservices, Micro-Frontends, Scalability, Performance Optimization

Experience

Persistent Systems

February 2024 – Present

Project Lead

Hyderabad, India

- Lead architecture and delivery of a scalable micro-frontend platform powering multiple SaaS products, aligning technical roadmap with business objectives.
- Defined and implemented a shared UI platform and SDK standardizing routing, state management, and authentication across 10+ product workstreams.
- Drove performance optimization initiatives including migration to Sitecore Headless and Next.js, improving page load speed by 30% and strengthening SEO for global domains.
- Established CI/CD security governance integrating Sonatype and Coverity quality gates, maintaining zero critical production vulnerabilities.
- Managed and mentored a team of 5 engineers through structured performance reviews, technical coaching, and delivery oversight.

GoTo Technologies

September 2021 – January 2024

Senior Software Engineer

Boston, USA

- Championed development of a centralized design system and reusable TypeScript component library, standardizing UX across global product lines.
- Improved engineering productivity by 40–60% through platform tooling, CLI automation, UI scaffolding, and GraphQL data layer integration.
- Institutionalized automated testing standards achieving 92% coverage with Jest and RTL, increasing platform reliability.
- Led accessibility and SEO modernization initiatives improving Lighthouse performance metrics across high-traffic enterprise pages.

Isobar US

August 2015 – September 2021

Interactive Developer

Boston, USA

- Architected enterprise-grade web applications for National and Enterprise Car Rental supporting high-traffic transactional workflows.
- Designed centralized API management and state governance framework using Redux to reduce complexity and improve maintainability.
- Reduced technical debt by 40% through component re-architecture and adoption of test-driven development practices.

Education

University of Massachusetts Boston

September 2013 – May 2015

Master of Science in Computer Science (GPA: 3.2/4.0)

Boston, USA

Koneru Lakshmaiah University

August 2009 – May 2013

Bachelor of Technology in Electronics & Communications (GPA: 7.7/10)

Vijayawada, India

Certifications

- ISB Executive Product Management Program Certification — Indian School of Business

Languages

- English — Full Professional Proficiency (C1), German — Intermediate Proficiency (B1)
