Dear Hiring Manager,

I am applying for SAP S/4HANA FICO roles in Germany where I can contribute to finance transformation programs that demand accuracy, system depth, and delivery ownership. With over 12 years of experience across SAP FI/CO consulting and enterprise finance operations, I bring hands-on expertise in S/4HANA implementations, ECC stabilization, and cross-module integration aligned to German market requirements.

In my current role at Accenture, I lead the FI workstream for an S/4HANA implementation covering PTP, OTC, GL, and Asset Accounting. I configure core FI processes, tax procedures, and banking integrations while ensuring seamless FI-MM and FI-SD integration. I work closely with business stakeholders and technical teams to translate finance requirements into scalable SAP solutions that support compliance, audit readiness, and standardized reporting.

My background combines consulting rigor with strong finance domain exposure. Earlier roles at IBM, Otis, and Volvo strengthened my ability to support ECC landscapes, manage production issues, and drive clean month-end close cycles. I have executed large-scale finance data migrations, validated high-volume financial data, and supported cutover activities with a strong focus on accuracy and risk control. These experiences align well with Germany's emphasis on process reliability, documentation quality, and system governance.

I bring deep working knowledge of SAP FI configuration, WRICEF design, FIT-GAP analysis, CPI and PI/PO integrations, banking formats such as MT940 and BAI2, and withholding tax setups. I also support user training and post-go-live stabilization, ensuring adoption and operational continuity. My approach focuses on clarity, ownership, and consistent delivery rather than surface-level execution.

I am actively seeking opportunities in Germany where I can contribute to long-term S/4HANA finance landscapes, collaborate with multicultural teams, and support regulatory-compliant finance operations. I am open to relocation and prepared to integrate quickly into German enterprise or consulting environments.

I look forward to discussing how my SAP FI/CO expertise can support your organization's finance transformation goals.

Sincerely,
Sheshadri Kumar
