Dear Hiring Manager,

I am writing to express my interest in a Senior Business Analyst position within your organization. With 8 years of experience in technical business analysis, requirement engineering, and process optimization across insurance, automotive, and financial services domains, I specialize in translating complex business objectives into structured, testable, and delivery-ready functional solutions.

In my current role at DXC Technologies, I lead enterprise insurance transformation initiatives across Policy Administration, Underwriting, and Claims workflows for multi-region clients. I translate business requirements into detailed functional specifications, conduct stakeholder workshops, and coordinate Agile delivery cycles for Xuber insurance platforms. Through structured root cause analysis and process modeling, I have reduced recurring production incidents by 30% and improved release turnaround by 20%, while ensuring regulatory compliance with Solvency II and IFRS standards.

Previously, I managed SLA-driven automotive system enhancements supporting dealer management platforms, where I implemented data-driven KPI dashboards and strengthened ITIL-aligned service governance. My earlier experience in fintech involved delivering prepaid card platform solutions, facilitating UAT, and coordinating cross-border stakeholders to ensure compliance and feature stability.

I bring strong analytical capability, stakeholder communication skills, and hands-on exposure to tools such as JIRA, Confluence, SQL, Power BI, and BPMN modeling frameworks. With growing German language proficiency and openness to relocation, I am motivated to contribute to structured, high-quality transformation initiatives within the German market.

I would welcome the opportunity to further discuss how my experience can support your organization's digital and operational transformation objectives.

Thank you for your time and consideration.

Yours sincerely,

Bharath Krishna Palakurthi
