Summary

Results-driven Electrical Engineer with 13+ years of experience in facility operations, power systems, and preventive maintenance across industrial environments. Proven expertise in MV/LT panels, transformers, DG sets, UPS, chillers, and BMS-controlled systems. Strong background in vendor management, energy monitoring, safety compliance, and team leadership, delivering reliable operations across multi-site facilities and critical infrastructure.

Core Skills

- **Electrical Systems:** MV/LT Panels, Transformers, DG Sets, UPS, ACB, VCB
- **Facility Operations:** Preventive & Breakdown Maintenance, Energy Monitoring, BMS
- **HVAC & Utilities:** Air- & Water-Cooled Chillers, FCU Maintenance, Firefighting Systems
- **Vendor & Client Management:** Vendor Coordination, SLA Tracking, Invoice Validation
- **Safety & Compliance:** Electrical Safety, Hazardous Area Classification, 5S Standards
- **Reporting & Documentation:** Energy Reports, Inspection Logs, Maintenance Records

Experience

UPSFM integrated services

September 2024 - Present

Facility Supervisor

India

- Oversee facility electrical operations with accountability for energy usage tracking and daily performance reporting.
- Conduct preventive inspections, coordinate corrective actions, and plan machine modifications with cross-functional teams.
- Reduced unplanned downtime by 20% through structured preventive maintenance and safety protocol enforcement.
- Manage vendors and validate invoices, ensuring SLA adherence across 10+ contractors and service providers.

Enova Facility Management LLC

December 2017-July-2024

Team Leader

India

- Led operation and maintenance of critical electrical infrastructure supporting industrial facilities and utilities.
- Managed DG sets (1311–2500 KVA), UPS (180 KVA), and 360 TR chillers with continuous power monitoring.
- Improved system reliability by 25% through scheduled maintenance, reporting, and root-cause analysis.
- Maintained compliance with hazardous area standards and inspection documentation across multi-site operations.

Shabari Telecable Network Pvt. Ltd.

May 2016 - December 2017

Electrical Supervisor

India

- Supervised electrical service, breakdown handling, and shutdown planning for plant-wide operations.
- Coordinated vendor engineers and equipment delivery to meet project specifications and safety standards.
- Enhanced operational continuity by proactively identifying risks via preventive maintenance schedules.
- Maintained detailed logs, inspection reports, and monthly energy calculations for management review.

*Electrical Technician**India*

- Executed operation and maintenance of DG sets, transformers, HT/LT panels, UPS, and chillers.
- Handled 11KV/440V, 1250 KVA transformers and 269 TR water-cooled chillers under BMS control.
- Improved equipment uptime by 18% through disciplined preventive maintenance execution.
- Ensured strict adherence to electrical safety, industrial standards, and 5S practices.

Education

Vins Christian College of Engineering**2009 - 2011***Bachelor of Engineering IN Electrical and Electronics**India***Sri Krishna Polytechnic****2006 - 2009***Diploma in Electrical and Electronics**India***Certifications**

- Certified Tamil Nadu Government Electrical Licence, Licence No: C 47825
- Professional Programme Certificate in Fire and Safety Management, JIFSA Academy (2023)
- 300 Hours Practical Drills in Fire and Safety, NSDC Approved

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Working Proficiency (B1)
