Dear Hiring Manager,

I am writing to express my interest in a Quality Assurance role within your organization. With 14 years of experience in GMP-regulated pharmaceutical manufacturing, I have developed strong expertise in Quality Management Systems, regulatory compliance, deviation investigations, and CAPA governance across USFDA, EDQM, WHO, and ISO frameworks.

In my current role as **Deputy Manager – Quality Assurance at Neuland Laboratories Limited**, I lead deviation lifecycle management, customer complaint investigations, and APQR preparation. Through structured root cause analysis and cross-functional collaboration, I improved deviation closure rates from 60 percent to 95 percent and achieved consistent audit CAPA closure across inspection cycles. My experience includes regulatory inspection support, customer audit coordination, process validation oversight, and strengthening documentation governance to enhance compliance readiness.

Throughout my career at **Neuland Laboratories, Hetero Labs, and Sainor Pharma**, I have consistently supported batch disposition, validation review, complaint management, and quality trend analysis within high-volume manufacturing environments. I am comfortable working in cross-functional teams across Production, QC, and Regulatory Affairs to ensure sustainable GMP compliance and operational excellence.

Germany's strong pharmaceutical regulatory standards and emphasis on quality culture align closely with my professional values. I am currently at B1 level in German and actively improving my language proficiency to integrate effectively within German regulatory and workplace environments. I am fully open to relocation and eager to contribute my quality expertise to a compliance-driven organization committed to operational excellence.

I welcome the opportunity to further discuss how my experience in GMP compliance, audit readiness, and CAPA management can support your quality objectives. Thank you for your time and consideration.

Yours sincerely,
Sreelatha Keshireddy
