Experience

Shell

May 2023 – Present

Senior IDT Product Manager, AI & Data

Bengaluru, India

- Own product vision and multi-year roadmap for Mobility Data House, a 1.8 PB AI-enabled SaaS platform supporting B2B, B2C, and retail analytics.
- Design and deliver Generative AI capabilities including LLM-powered reporting assistants via APIs and conversational interfaces, enabling self-serve analytics.
- Drive \$250M+ business value by reducing issue resolution time by 40%, improving first-contact resolution to 95%, and accelerating decisions.
- Lead 50+ member global team across product, engineering, data, and DevOps, achieving 92% cloud carbon reduction while improving performance and efficiency.

Shell

June 2019 – April 2023

Technical Product Manager, Emerging Technologies

Bengaluru, India / Amsterdam, Netherlands

- Owned delivery for emerging technology initiatives focused on AI, machine learning, blockchain, AR/VR, robotics, and IoT automation.
- Built ML-powered automation solutions into operational workflows, eliminating manual checks and improving reliability and speed.
- Implemented real-time analytics platforms for frontline teams to monitor performance, detect anomalies, and trigger corrective actions.
- Delivered \$20M annual cost savings while scaling solutions globally aligned with regulatory, security, and operational constraints.

Shell

March 2016 – May 2019

Technical Product Manager, Analytics & Mobility

Bengaluru, India / London, United Kingdom

- Led migration of 1.8 PB operational analytics platform supporting 2,500+ users from legacy SAS to cloud-native SAS Viya on Azure.
- Modernized analytics architecture to improve reliability, scalability, and performance for global operational decision support.
- Reduced infrastructure and operational costs by 40% while improving platform stability and scalability.

Infinite Computer Solutions

November 2014 – March 2016

Senior Product Strategy Analyst

Bengaluru, India

- Led SAS 9.4 platform migration for 5,000 users under the HEINEKEN analytics transformation program, delivering OS and platform upgrades with minimal downtime while improving performance and stability across 165 breweries in 72 countries. .
