Dear Hiring Manager,

I am writing to express my interest in senior product leadership opportunities within AI, data platforms, and digital transformation. With over 15 years of experience building AI-enabled, cloud-native data platforms at global scale, I have led multi-year product strategies delivering more than \$250M in measurable business value. My experience spans Generative AI, enterprise analytics, large-scale cloud modernization, and governance-driven digital programs aligned with global and EU regulatory standards.

Currently at Shell, I own the end-to-end product vision and roadmap for Mobility Data House, a 1.8 PB AI-enabled SaaS platform serving B2B, B2C, and retail analytics use cases globally. I lead a distributed team of 50+ professionals across product, engineering, and DevOps, delivering scalable AI solutions including LLM-powered assistants and self-serve analytics platforms. These initiatives have reduced issue resolution time by 40%, improved first-contact resolution to 95%, and driven significant operational efficiency while achieving a 92% cloud carbon reduction—supporting sustainability and ESG objectives.

Previously, I led emerging technology initiatives integrating AI, ML, IoT, AR/VR, and automation into enterprise workflows, generating \$20M in annual cost savings. I also spearheaded the migration of a 1.8 PB analytics ecosystem from legacy infrastructure to cloud-native SAS Viya on Azure, improving reliability, scalability, and cost efficiency by 40%. Throughout my career, I have combined strong technical depth with strategic product thinking, ensuring secure, compliant, and performance-driven platform delivery across global regions including Europe.

I am particularly motivated to contribute to organizations in Germany that are advancing AI-driven digital transformation, sustainability, and platform innovation at scale. With intermediate German proficiency (B1), international leadership exposure, and deep expertise in AI and data ecosystems, I am confident in my ability to create measurable impact while aligning with EU governance and regulatory frameworks. I would welcome the opportunity to further discuss how my experience can support your strategic objectives.

Sincerely,

Sri Narasimha Raviteja Komarasetti
