Dear Hiring Manager,

I am applying for a **Principal Drug Safety Physician / Pharmacovigilance Lead** role in Germany. I bring **7+ years** in global PV across post-marketing and clinical trial safety, with hands-on ownership of **ICSR medical review, signal management, benefit-risk assessment, and aggregate reporting** aligned to **EU-GVP** expectations.

In my current role at Parexel, I run end-to-end medical review for post-marketing and trial cases and keep assessment quality consistent across teams. I apply **causality, seriousness, and expectedness** with clear medical rationale, and I guide **signal triage and evaluation** to support timely safety actions. I also deliver medical input for **PBRER/PSUR, DSUR, and ASR** cycles and maintain inspection-ready documentation standards that stand up to **EMA/MHRA/FDA** scrutiny.

I operate comfortably in safety governance. I chair and contribute to **Safety Review Team (SRT)** discussions, handle escalations, support SAE review forums, and coordinate decisions with clinical, regulatory, and operations stakeholders. This approach keeps risk decisions traceable, supports compliant submissions, and protects patient safety without slowing delivery. I also mentor and train physicians and PV professionals to raise review consistency and documentation quality.

Germany's PV roles demand strong EU-GVP alignment, crisp medical judgment, and documentation that holds under inspection. I deliver all three, backed by high-volume case review experience and structured writing discipline, including a **Phase IV vaccine safety and immunogenicity publication**. I am ready to relocate and contribute in a sponsor or CRO setting supporting EU markets.

Sincerely,

Dr. Navpreet Singh Virk
