Dear Hiring Manager,

I am applying for **CXM Transformation Director and Contact Center Transformation Lead roles in Germany**. I lead omnichannel CRM and contact center modernization programs that improve NPS, CSAT, and operational KPIs such as FCR, AHT, call deflection, and abandonment. I bring **15+ years across enterprise and public sector environments, with hands-on ownership from discovery and solution design through rollout, adoption, and governance**.

In my current role as CXM Practice Lead at Trustnow Technologies, I **run end-to-end CXM transformation delivery across MEA**. I align CX strategy, target operating model, and a measurable KPI framework with business outcomes. I lead omnichannel CRM and contact center solution design, including integration planning, rollout readiness, and adoption governance. I **drive weekly operating reviews and improve service performance by 25% through AI automation**, KPI tuning, and disciplined delivery controls. I also scale delivery across 8+ team members and 15+ stakeholders through partner and vendor alignment.

Germany's CXM programs demand strong governance, channel integration, and measurable service outcomes. I deliver this through PMO rigor and executive-level stakeholder management. At Conneqt Business Solutions (Tata BSS), I ran CEO-office transformation initiatives, supported M&A diligence and integration tracking, and built real-time KPI dashboards for leadership. I **improved decision velocity by 30% by tightening reporting cadence, ownership, and risk controls**. This mix of CX depth and program governance helps reduce delivery risk while improving customer outcomes.

I also bring practical automation experience that supports the efficiency targets common in German customer operations. At Vistas Global, I delivered process transformation and implemented WhatsApp chatbot automation with monitoring and governance. I **improved NPS and CSAT by 10% and reduced call abandonment by 15% within 6 months**. I built the India Delivery Center governance and hiring plan to improve throughput by 20% across remote teams.

I am ready to deliver CXM transformation programs in Germany that improve customer experience, strengthen service performance, and scale repeatable delivery. I would welcome the opportunity to discuss how I can drive measurable CX outcomes across your CRM and contact center landscape.

Sincerely,
Saritha Pingali
