Dear Hiring Manager,

I am writing to express my interest in a Disaster Recovery and Business Continuity position within your organization. With 10 years of experience across global consulting and banking environments, I specialize in governing enterprise disaster recovery programs across cloud and data center platforms, ensuring operational resilience for mission-critical applications.

In my current role as Disaster Recovery Manager, I lead end-to-end recovery planning across Azure, AWS, and hybrid environments. My responsibilities include Business Impact Analysis alignment, runbook governance, annual DR test planning, cross-functional simulation coordination, and risk remediation tracking. I work closely with infrastructure, security, and application teams to strengthen recovery readiness and ensure structured execution within defined change windows.

Previously, in senior roles within global financial services, I acted as Disaster Recovery Governance SPOC during audits and regulatory reviews, managed third-party recovery vendors, and delivered structured DR drills and tabletop exercises. My experience also includes cloud migration recovery design, monitoring and incident coordination using enterprise observability platforms, and proactive risk identification to minimize downtime exposure.

I bring strong ITIL-based service management knowledge, hands-on exposure to Azure and AWS environments, and a disciplined governance approach suited for regulated industries. With German language proficiency at B1 level and openness to relocation, I am motivated to contribute to resilient IT operations within the German market.

I would welcome the opportunity to further discuss how my experience can support your organization's resilience and continuity objectives.

Thank you for your time and consideration.

Yours sincerely,

Nitthesh Kumar
