Dear Hiring Manager,

I am applying for HR Operations roles in Germany. I bring 3 years of HR experience, including 2 years as an HR Generalist and 1 year in Recruitment and Talent Acquisition. I run high-ownership HR operations across onboarding, attendance, employee records, HRIS updates, and payroll inputs, and I keep processes audit-ready through consistent documentation and data quality control.

In my current role as **Senior HR Executive at Xandari Resorts (Muthoot Group)**, I support the employee lifecycle for 180 employees across four sites. I maintain HRIS master data, compile monthly HR reports, and manage payroll inputs through structured cutoffs and validation checks. I coordinate onboarding and joining documentation for around eight hires per month and drive timely closures by partnering with managers and site teams. Additionally, I manage leave and attendance governance to keep records current and payroll-ready.

Previously, at **Chemmanur International Holidays**, I combined HR administration with recruitment coordination. I supported job posting workflows, interview scheduling, and candidate communication while managing HR documentation and attendance tracking for 120 employees. **I improved time to schedule** by tightening follow-ups, organizing interview logistics, and maintaining clear trackers for hiring stakeholders. Earlier at **Joways IT Solutions**, **I strengthened records accuracy** by validating attendance and leave updates for hourly staff and resolving mismatches quickly.

I will bring the same discipline to a Germany-based HR team: reliable HR operations, GDPR-aware handling of employee data, consistent HR documentation, and smooth hiring coordination. I work well with cross-functional stakeholders, prioritize accuracy and speed, and keep HR processes predictable for employees and managers.

Sincerely,

Anjali George
