Dear Hiring Manager,

I am writing to express my interest in Business Analyst / Product Owner opportunities within your organization. With over **8 years of experience** delivering digital and enterprise platforms across **e-commerce, food & grocery delivery, events, and enterprise IT**, I bring a strong blend of business analysis expertise, Agile delivery experience, and cross-border stakeholder collaboration relevant to Germany and EU markets.

In my recent role at **Intellivo Solutions (UK)**, I owned end-to-end business analysis for mobile and web platforms, translating complex stakeholder needs into structured user stories, acceptance criteria, and sprint-ready backlogs. Working closely with UX designers, engineers, and operations teams across **EU-India distributed environments**, I supported UAT coordination and release sign-off, contributing to a **20% acceleration in release cycles** across multiple modules. My ability to bridge business objectives with technical execution has consistently enabled scalable and user-centric solutions.

Previously at **Unitemps (UK)**, I supported internal digital systems focused on onboarding, payroll automation, and process reliability. Through iterative Agile delivery, testing, and stakeholder feedback, I improved data accuracy and operational efficiency. My early career at **Hewlett Packard Enterprise** further strengthened my foundation in enterprise systems, customer requirement analysis, and structured documentation while working with multi-region enterprise clients.

I hold an **MSc in Computer Science (Business Computing)** with distinction and am currently pursuing **CBAP certification**. I also bring hands-on experience with Excel analytics, SQL (GenAI-assisted), Power BI, and Agile tools. Alongside my professional background, I have **intermediate German proficiency (B1)** and am actively improving my language skills to integrate effectively into German workplaces.

I am highly motivated to relocate to **Germany** and contribute to organizations building impactful digital products in fast-paced, Agile environments. I would welcome the opportunity to discuss how my experience and skills can support your team's business and product goals.

Thank you for your time and consideration.

Sincerely,
Deepika G
