Dear Hiring Manager,

I am writing to apply for SAP Finance Analyst roles within Procure to Pay, Record to Report, or finance operations functions. With over five years of experience supporting global finance environments, I bring strong hands-on expertise across SAP S/4HANA, SAP Ariba, and end-to-end finance processes, combined with a solid foundation in compliance, audit readiness, and stakeholder collaboration.

In my current role at Accenture, I manage end-to-end Travel and Expense operations while supporting SAP S/4HANA and Ariba workflows to resolve complex PO, invoice, and vendor master issues. Through structured root cause analysis and strong control discipline, I have improved month-end close accuracy by approximately 20% and reduced ticket backlogs by an estimated 25%, while supporting more than 15 cross-functional stakeholders across finance and procurement teams.

Previously at Datamatics Global Services, I supported high-volume Procure to Pay operations, performing detailed reconciliations across pricing, quantity, and tax components. By implementing consistent quality checks and discrepancy resolution practices, I contributed to an approximate 18% reduction in invoice processing errors. Earlier in my career at ESDS Software Solutions, I gained valuable exposure to compliance and internal audit activities, strengthening my understanding of SOX controls, documentation standards, and risk mitigation.

Alongside my professional experience, I am currently pursuing an MBA to further strengthen my business and financial acumen. I am proficient in English and have intermediate working proficiency in German (B1), and I am actively seeking opportunities to contribute to finance transformation, SAP operations, and compliance-driven roles within Germany or the wider EU.

I would welcome the opportunity to discuss how my SAP finance expertise, analytical approach, and commitment to process excellence can add value to your organization. Thank you for your time and consideration.

Sincerely,
Merylene Sturt
