Dear Hiring Manager,

I am applying for security and GRC leadership roles in Germany where regulatory rigor, data protection, and audit readiness are core business requirements. With 14+ years of experience leading enterprise security, compliance, and risk programs, I bring hands-on ownership of ISO 27001, GDPR, PCI-DSS, and multi-region regulatory frameworks within large, complex organizations.

In my current role at Accenture, I lead global data protection and compliance programs across regulated industries and multiple growth markets. My work centers on designing control frameworks, mapping regulatory obligations, and embedding security requirements into contractual and delivery processes. I actively drive control testing and remediation cycles, executing over 200 control assessments and improving compliance maturity by 30%. This role demands close coordination with legal, audit, and engineering teams, ensuring security controls remain effective, auditable, and aligned with business outcomes.

I have extensive experience operating in audit-driven environments, supporting internal audits, external certifications, and client-led compliance reviews. My background includes ownership of risk assessments, evidence management, remediation tracking, and audit closure. I work directly with stakeholders across regions to resolve gaps, standardize controls, and strengthen governance without slowing delivery. This balance between compliance and execution is critical in regulated EU environments.

Earlier in my career at Wipro and Mphasis, I led security operations across endpoint security, DLP, vulnerability management, and incident response for large enterprise client estates. I managed L2/L3 escalations, access reviews, patching cycles, and encryption compliance at scale. These roles built my foundation in operational security, technical risk, and measurable improvement in threat response effectiveness.

Germany's strong focus on GDPR enforcement, data protection, and structured governance aligns closely with my experience. I bring a disciplined, evidence-driven approach to security programs, combined with the ability to work across cultures and regulatory expectations. I am currently learning German and fully open to relocation.

I would welcome the opportunity to discuss how my experience can support your organization's security, compliance, and regulatory objectives.

Sincerely,

Varun H N
