- **Leadership:** Task Allocation, Team Onboarding, Knowledge Transfer, Stakeholder Management, Interview Panels

Experience

Kerv Digital Pvt. Ltd.

July 2021 - Present

Project Test Lead

Bengaluru, India

- Own enterprise-wide QA strategy and release quality governance across multi-system CRM and MDM programs.
- Translate business and functional requirements into end-to-end test coverage, maintaining RTM in Azure DevOps.
- Lead UAT planning and execution, partnering with Product Owners and business stakeholders to secure formal release sign-off.
- Apply risk-based testing methodologies to prioritize high-impact scenarios and proactively mitigate delivery risk.
- Provide cross-functional leadership across QA, development, and business teams, ensuring alignment and delivery accountability.
- Contribute to QA capability building through team onboarding, mentoring, performance oversight, and technical interview panels.

Mindtree

June 2020 - November 2020

Senior Test Engineer

Bengaluru, India

- Executed functional, regression, and release validation testing for enterprise applications.
- Coordinated QA schedules and reporting with cross-functional teams to improve release readiness.
- Validated defect fixes and ensured quality compliance prior to production sign-off.

Wipro Pvt Ltd

January 2016 - June 2020

Stibo STEP Application Tester

Bengaluru, India

- Performed functional and integration testing for Stibo STEP MDM/PIM implementations.
- Validated product hierarchies, workflows, UI configurations, and large-scale data migrations.
- Supported backend validation using SQL and integration testing across connected systems.

Key Projects

The Hartford – Insurance Platform

- Performed web form and API XML validation for AARP, vehicle, and home insurance products, ensuring accurate policy processing.
- Validated end-to-end workflows across frontend, backend, and integration layers to maintain data integrity and compliance.

Lloyds Bank – Digital Banking Application

- Tested core banking transactions across mobile/web apps, backend services, and database systems.
- Executed SQL-based validation and regression testing to ensure secure and accurate financial processing.

Philips Lighting – Product Information Management

- Validated product lifecycle workflows in Stibo STEP MDM from data creation to publishing in AEM and web platforms.
- Ensured data accuracy, hierarchy integrity, and seamless integration across digital commerce channels.

BICA – Chartered Accountants Portal

- Tested membership application portals integrated with CRM workflows and backend APIs.
- Validated business process flows, data rules, and submission lifecycle for regulatory compliance.

SAICA – Membership Management System

- Performed functional and API testing for membership onboarding and portal-based submissions.
- Validated CRM-driven workflows and backend integrations to ensure seamless process automation.

The Scouts Association UK – Membership & Events Platform

- Tested event management modules including permits, grants, night-away events, and membership processes.
- Ensured end-to-end validation across CRM, portal interfaces, and backend integrations for operational reliability.
