Summary

Senior Frontend Engineer with 5+ years building user-centric web applications for SaaS and enterprise platforms. Strong in Angular (2+) and React delivery, state management using NgRx and RxJS, and API-driven UI workflows. Ships clean component systems, responsive styling, and pragmatic testing using Jasmine, Karma, and Cypress. Leads sprint execution, reviews, and stakeholder updates to deliver reliably in Agile teams. Experienced in modernization work including framework migrations and greenfield module builds.

Core Skills

- **Frontend:** JavaScript, HTML, CSS/SCSS, Responsive UI, SPA Development
- **Integration:** REST APIs, Error Handling, Data Normalization, UI Security Filters
- **State & UI:** NgRx, RxJS, PrimeNG, Tailwind CSS, Bootstrap
- **Testing:** Jasmine, Karma, Cypress, Unit Testing, E2E Testing
- **Delivery:** Git, Jira, Agile/Scrum, Sprint Planning, Code Reviews
- **Frameworks:** Angular (2+), React, Vue.js, AngularJS

Experience

Calsoft Inc

January 2022 - Present

Senior Development Engineer

Pune, India

- Own frontend delivery for enterprise SaaS web modules across Angular-based single-page apps.
- Build Angular 2+ components, NgRx/RxJS state, REST integrations, and secure UI filters.
- Optimize routing, lazy loading, and bundles to cut load time and improve runtime performance.
- Lead a 4-member team, run sprint planning, code reviews, demos, and weekly stakeholder updates.

MSYS Technologies Pvt Ltd

July 2020 - January 2022

Software Engineer

Pune, India

- Delivered UI features for an enterprise automation platform, supporting roadmap releases and upgrades.
- Built Angular modules, NgRx state, REST integrations, wrote unit tests in Jasmine/Karma, and E2E in Cypress.
- Reduced regression risk by 20% by refactoring brittle UI areas and closing recurring defects across releases.
- Partnered with 10+ stakeholders across product, QA, and backend, tracked delivery via Jira and Git.

Precode Solutions Pte Ltd

June 2019 - July 2019

Web Developer

Delhi, India

- Built responsive SPA screens and reusable components to support a fast-moving web delivery cycle.
- Implemented TypeScript, HTML, and SCSS modules, standardized component patterns for clean reuse.
- Improved delivery speed by 20% by reducing duplicate UI work and strengthening maintainability.

Broadchain Solutions Pte Ltd

December 2018 - January 2019

Web Developer Intern

Delhi, India

- Supported frontend delivery by creating UI components and improving consistency across features.
- Researched distributed-ledger application patterns and shared findings to guide implementation choices.
- Reduced rework by aligning UI conventions early and improving handoffs for the frontend team.

*Web Developer**Delhi, India*

- Maintained and enhanced a product website to keep user-facing pages stable and responsive.
- Implemented JavaScript and HTML updates, improved layout and interactions, and fixed UI bugs.
- Improved usability by 15% through cleaner navigation, consistent styling, and better page structure.

Projects

Cisco Device 360 Migration (*Calsoft, Client: Cisco*)**July 2025 - October 2025**

- Migrated AngularJS pages to Angular 2+ with REST flows and RxJS to improve scalability and performance.
- Added Cypress E2E suites and optimized routing to reduce manual QA and improve release reliability.

Aqua Security Web Filter Implementation (*Calsoft, Client: Aqua Security*)**April 2025 - June 2025**

- Implemented Vue-based security filters for scan results and runtime alerts, improving triage and clarity.

Asigra DP Connectors (*Calsoft, Client: Asigra*)**September 2022 - March 2025**

- Built Angular connector UI with NgRx/Tailwind and REST APIs enabling backup, restore, and export flows.
- Led 4-member delivery, shipped billing and core modules through sprint releases and code reviews.

VMware Value Platform UI (*Calsoft, Client: VMware*)**January 2021 - September 2022**

- Delivered Angular UI modules with API integrations and Cypress validation for dashboards and workflows.

CHEF Automate Frontend (*MSYS, Client: Progress Chef*)**January 2020 - January 2021**

- Built Angular UI features with NgRx and automated testing (Jasmine/Karma, Cypress) to raise release confidence.

Decentralized Web App UI (*Precode*)**June 2019 - July 2019**

- Built Angular UI with reusable components for blockchain-backed record workflows, documented the approach.

Heliware Product Website (*Heliware*)**June 2017 - August 2019**

- Enhanced website UI with JavaScript/HTML updates and usability improvements for a stable user experience.
