

AISHWARYA V KOUSHIK

Bengaluru, India (Open to relocate)

☎ +91 99164 46612 ✉ koushikaishwarya6@gmail.com [in](#) [Aishwarya Koushik](#)

Visa Status: **Family Reunification Visa** – legally authorized to reside and work in Germany

Summary

Results-driven Software & AI-Based Engineer with 2+ years across AI, backend, and cloud-native systems. Experienced in building production-grade LLM platforms, metadata-driven retrieval systems, and scalable microservices. Strong background in Python, AWS, and applied machine learning with a proven record of improving accuracy, efficiency, and developer productivity across enterprise data platforms.

Core Skills

- **AI & ML:** RAG, LLM Integration, LangChain, Embeddings, Model Evaluation, LangGraph
- **Backend:** Java, Spring Boot, REST APIs, Microservices
- **Data:** SQL, Metadata Systems, Vector Databases
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, CI/CD
- **Programming:** Python, Java, React
- **Domains:** Enterprise Data Platforms, AI Assistants, Knowledge Systems
- **AI Systems:** Knowledge Graphs, Agentic AI, NLP-to-SQL Systems

Experience

Guidewire Software

January 2025 - Present

Software Engineer, Machine Learning

Bengaluru, India

- Architect an AI-first insurance data intelligence platform combining metadata knowledge graphs and agentic AI assistants, improving data discovery speed by 60% and reducing manual exploration effort.
- Build DataGPT to extract schemas, entities, and SQL definitions, and construct lineage graphs using Kahn's algorithm, reducing data mapping effort by 40% and improving processing efficiency.
- Generate LLM-enriched YAML knowledge artifacts from enterprise insurance datasets to standardize metadata and improve reuse across teams.
- Build a RAG pipeline for schema exploration, NL-to-SQL, and intent routing, reducing query generation time by 55% and improving response latency by 30%.
- Deliver a secure multi-tenant AWS architecture handling 1M+ rows, improving SQL accuracy by 70% and reducing data retrieval latency by 25%.

International Institute of Information Technology Bangalore

July 2024 - December 2024

Teaching Assistant

Bengaluru, India

- Supported postgraduate Machine Learning coursework through lectures, labs, and evaluation for 60+ students.
- Mentored students on model experimentation, performance evaluation, and Python-based ML frameworks.
- Guided end-to-end ML project implementations including supervised learning, model optimization, and pipeline development.

Bosch Global Software Technologies

September 2021 - June 2023

Design Engineer

Bengaluru, India

- Designed embedded systems for battery health monitoring and connected vehicle platforms.
- Developed tyre pressure monitoring system with wireless telemetry for agricultural vehicles.
- Enabled real-time parameter tracking across multi-sensor hardware prototypes.

Education

International Institute of Information Technology Bangalore

July 2023 - July 2025

Master of Technology in Machine Learning and Artificial Intelligence

Bengaluru, India

Visvesvarayya Technological University

August 2017 - August 2021

Bachelor of Engineering in Electronics and Communication

Bengaluru, India

Awards

- Dean's Merit Award, IIIT Bangalore (Academic Excellence, M.Tech).
- Organizational Leadership Recognition, Guidewire Software.

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Working Proficiency (B1)
