## Summary

Senior software developer with 13+ years delivering enterprise platforms across e-commerce, banking, insurance, and identity. Builds Spring Boot microservices and REST APIs with clean service design, test automation, and production support ownership. Hands-on with Kubernetes, Docker, CI/CD pipelines, and observability tooling in cloud environments. Actively applies GenieAI tools to improve code quality, refactoring speed, and test coverage under Agile Scrum delivery.

## Core Skills

- **Backend:** Java (8, 11, 17, 21), Spring Boot, Spring MVC, Hibernate
- **Frontend:** Angular 10, React, TypeScript, RxJS
- **APIs:** Microservices, REST API, SOAP, Swagger/OpenAPI, Postman
- **CI/CD:** Jenkins, Maven, SonarQube, GitHub, GitLab, Bitbucket, Concord
- **Data:** Kafka, Oracle, MS SQL Server, MySQL, MongoDB, PostgreSQL, DB2, XML, XSD, XSLT
- **Operations:** Kibana, Splunk, Dynatrace, Log4J, Jira, ServiceNow
- **AI Tools:** GenieAI (code assistance, refactoring, unit test generation)
- **Cloud:** AWS, Kubernetes, Docker, Azure Cosmos DB, Walmart

## Experience

**Coforge Ltd (Client: Walmart - LTL Carriers Development)**

**October 2023 - October 2025**

*Lead Java Developer*

*Bangalore, India*

- Owned end-to-end LTL pickup workflow APIs for carrier availability, scheduling, rescheduling, and cancellations.
- Built Spring Boot microservices integrating Oracle and legacy events, persisted workflow state and audit data in Azure Cosmos DB.
- Apply GenieAI tools to accelerate code reviews, refactoring, and unit test generation, improving developer productivity and delivery speed.
- Reduce integration defects by 20%, enforce idempotency, strict validation, and contract tests across carrier integrations.
- Integrated RESTful APIs using Axios / Fetch and handled asynchronous operations with Promises.
- Integrated monitoring and logging with Prometheus and Grafana, reducing production incident resolution time by 30%.
- Developed Kafka producers and consumers using Spring Boot with Spring Kafka, reducing synchronous REST dependencies across services.
- Monitored Kafka clusters using Prometheus and Grafana, improving issue detection and resolution time.

**PTEC (Client: Equifax - Document Expiry Alert)**

**August 2022 - June 2023**

*Lead Software Developer*

*Trivandrum, India*

- Delivered expiry alert services for passport and driving license renewals within identity portal bundles.
- Implemented AWS auth, S3, and Secrets Manager configuration, exposed REST endpoints with Spring Boot.
- Improved reminder delivery reliability by 15% using retries, logging, and unit tests.
- Integrated RESTful APIs using Angular Http Client and handled asynchronous data with RxJS Observables.
- Strengthened cloud security using AWS IAM, VPC, encryption, and secure API gateway integrations.
- Optimized Kafka performance by tuning broker configurations (replication factor, batch size, retention policy), reducing processing latency by 20%.

**UST Global (Client: Equifax - Luggage Key Tag)****August 2021 - July 2022***Senior Java Developer**Trivandrum, India*

- Delivered API feature to generate and download unique barcode luggage key tags within the YC&I portal.
- Built Spring Boot endpoints, resolved incidents via ServiceNow and Jira, shipped fixes via releases.
- Reduced operational risk by 10% by coordinating certificate renewals and infrastructure upgrades.
- Worked on configuration part of API in Angular 10 and Style.css file.
- Ensured secure communication using SSL, SASL authentication, and role-based access controls.

**Cognizant (Client: Great American Insurance Company)****September 2018 - August 2021***Senior Consultant**Chennai, India*

- Built batch conversion pipelines to transform policy and claim data to XML and push into EDW.
- Developed multithreaded SOAP pushes, added control-table validation, and automated UC4 schedules.
- Reduced manual ETL checks by 30% and improved daily run consistency via automation.

**Capgemini (Client: Synchrony Financial Services - Freeze and Unfreeze)****August 2016 - August 2018***Associate Consultant**Chennai, India*

- Enhanced e-commerce credit card platform modules across retail clients, including freeze and unfreeze.
- Refactored Struts and Spring flows, built pricing, benefits, profile, and alerts with verification.
- Accelerated feature delivery by 20% through sprint ownership and code quality tooling.

**Gowri Solutions (Clients: Verizon, GE - Steinmart Rewards)****September 2012 - August 2016***Software Engineer**Pondicherry, India*

- Delivered Java web features for telecom and banking loyalty platforms, including order key management.
- Built Spring MVC REST services and MySQL-backed logic for rewards, offers, accounts, and payments.
- Improved release stability by 15% via validation checklists and defect triage.

**Education**

---

**Sri Manakula Vinayagar Engineering College, Pondicherry University****May 2007***BTech in Information Technology**Puducherry, India***Certifications**

---

- Git for DevOps
- Adopting DevOps
- DevOps Principles and Practices
- DevOps Essentials
- Agile Software Development with Scrum
- Working with XSLT
- CXML7 Training (Client Side)

**Languages**

---

- English - Full Professional Proficiency (C2)
- German - Intermediate Working Proficiency (B1 Learning)
