Dear Hiring Manager,

I am writing to apply for Finance Manager and senior finance leadership opportunities within your organization. With over 18 years of experience across project finance, accounting, ERP implementations, and governance, I bring strong hands-on expertise in managing complex, multi-entity financial operations across construction, energy, hospitality, and manufacturing sectors.

In my current role as Finance Manager at Everrenew Energy Pvt Ltd, I oversee end-to-end project finance, controlling, and accounting for a portfolio of 16 projects valued at over INR 1,200 crore, spanning multiple regions. My responsibilities include project costing, cost center accounting, SAP reviews, forecasting, audit readiness, and executive reporting. I work closely with leadership to ensure financial accuracy, strong internal controls, and timely decision support across active projects.

Previously, I held senior finance roles at SPR India Construction, Qatar Infrastructure (Taleb Group), Sterling Holidays, and Club Mahindra, where I managed large-scale project accounting, audits, and ERP transformations. I have led SAP FICO and ERP implementations, supported cross-border finance operations in India and the Middle East, and consistently strengthened governance, compliance, and reporting standards in complex project environments.

I am particularly interested in opportunities in Germany due to its strong regulatory framework, emphasis on financial governance, and long-term infrastructure and energy investments. I am open to relocation, comfortable working in international and multicultural environments, and bring professional working proficiency in English (C1) along with elementary proficiency in German (A2), which I am actively improving.

I would welcome the opportunity to discuss how my experience in project finance, ERP-driven financial controls, and executive reporting can contribute to your organization's financial and operational objectives.

Sincerely,
Apsar Khan Unis Khan
