Germany

Summary

Manufacturing and production engineer with 5+ years of experience in glass and industrial manufacturing environments. Strong expertise in product development, process optimization, quality control, and SAP-enabled operations. Proven ability to translate design intent into stable, high-throughput production while meeting safety, cost, and reliability targets across cross-functional teams.

Core Skills

- **Quality & Compliance:** Quality Control, ISO Standards, Defect Analysis, Corrective Actions
- **Engineering:** Product Development, Mechanical Inspection, Design Validation, Experimental Analysis
- **Manufacturing & Operations:** Production Engineering, Process Optimization, Capacity Planning, Downtime Reduction
- **Tools & Systems:** SAP, Technical Documentation, Production Reporting
- **Commercial & Leadership:** Supplier Management, Cost Control, Risk Assessment, Cross-Functional Coordination
- **Lean & Safety:** Continuous Improvement, Root Cause Analysis (RCA), SOP Development, Workplace Safety

Experience

Haldyn Heinz Fine Glass Pvt. Ltd.

December 2023 – Present

Executive Engineer

India

- Owned end-to-end product analysis and validation for glass components to ensure safety, reliability, and production readiness.
- Engineered mechanical designs and conducted structured experiments using statistical analysis to validate performance assumptions.
- Improved production consistency by 12% through quality controls, corrective actions, and process optimization initiatives.
- Coordinated 10+ cross-functional stakeholders to manage scope, schedule impact, and cost control across initiatives.

Piramal Glass Ltd.

June 2021 – May 2022

Hot End Engineer

Gujarat, India

- Led hot-end process engineering for product modeling, prototype validation, and production parameter stabilization.
- Executed experiments and theoretical evaluations to improve reliability, safety, and yield of glass products.
- Reduced process deviations by 15% by managing risk, cost, and schedule impacts across production changes.
- Supported shift operations and production targets across multi-line manufacturing environments.

- Supported PB, NNBP, and B&B production lines to maintain efficiency, quality, and equipment uptime.
- Troubleshoot defects and optimized processes, improving line efficiency by ~10% and reducing downtime.
- Enhanced production planning and capacity utilization through schedule optimization and bottleneck analysis.
- Managed supplier coordination for cost, delivery, and quality across 5+ external vendors.

Education

Languages

- English — Full Professional Proficiency (C1)
- German — Basic Proficiency (A2)
