Dear Hiring Manager,

I am applying for Sales and Business Operations roles in Germany where revenue operations, process governance, and cross-functional execution drive measurable growth. With over eight years of experience in diagnostics and healthcare, I bring hands-on ownership of enterprise onboarding, financial operations, and digital transformation at scale.

In my current role at Apollo Health & Lifestyle, I lead end-to-end sales onboarding and operational governance for more than 140 enterprise and aggregator accounts. I manage portfolios exceeding INR 2.5 Crore in monthly revenue and work closely with sales, finance, and clinical teams to ensure execution discipline, forecasting accuracy, and cash-flow visibility. I actively drive digital initiatives such as e-invoicing and self-service portals to reduce manual effort and improve turnaround time.

Previously, I spearheaded reconciliation automation and SOP standardization across regions, reducing financial errors and cycle time by 40%. I integrated M&A revenue exceeding INR 6 Crore within six months through structured onboarding and close coordination with finance teams. I also built executive MIS dashboards that enabled leadership to track collections, receivables health, and operational risks in real time.

My background combines revenue operations, analytics, and stakeholder governance. I work comfortably in data-driven environments and use tools such as Excel, Power BI, CRM systems, and Salesforce to support decision-making. I focus on clarity, accountability, and predictable execution, qualities expected in regulated, process-driven European organizations.

I am motivated to contribute these strengths in Germany, where operational rigor, transparency, and cross-team collaboration are critical. I would welcome the opportunity to discuss how my experience aligns with your business objectives.

Sincerely,

Mahesh Reddy B
