Summary

Operations and Manufacturing Leader with 18+ years of experience in plastics and packaging industry after M.Tech in plastics Engineering. Expertise in extrusion blow moulding, injection moulding, injection stretch blow moulding, injection blow moulding, Twin Screw Extruder and blow film technologies. Strong background in production operations, quality assurance, environmental management systems, and regulatory compliance. Demonstrated capability in plant leadership, cost optimization, vendor development, and packaging process improvement. Consistently drives operational excellence through structured quality systems and high performing cross functional teams.

Core Skills

- **Packaging & Materials Development:** Packaging Development, Materials Development
- **Blow Moulding & Injection Technologies:** Extrusion Blow Moulding Blow Star Italy SMC Jihaung Togda Tonwa CMP for Mono and COEX PA EV Bottles, Injection Moulding Machines Arburg L and T Toshiba Haitian Ferromatik Electronic for Caps and Closures, Injection Blow Moulding Jomer 20 65 Victors MSZ65, Injection Stretch Blow Moulding ASB 50MB 70DPH PF 06 and 12M
- **Client & Stakeholder Management:** Client Relationship Management
- **Quality & Compliance:** Quality Management, Environment Management, Quality Audits, Customer Complaint Handling
- **Extrusion & Printing Systems:** Reifenhäuser Blown Film Extrusion, Flexographic Printing Machine Uteco Italy, Wadding Machine Electronic Device, Twin screw extruder
- **Recycling Technology:** Next Generation Recycling Machine NGR S Grain 125 Germany
- **Operations & Production Management:** Production Operations, Production Planning and Control, Processing, Machine Installation

Experience

Ukhi India Private Limited

May 2025 – Present

Head – Operations

Haryana, India

- Scaled pilot biopolymer operations to full commercial production, improving plant capacity utilization by 20% and delivering monthly throughput targets aligned with replacement of 24 lakh kg conventional plastic annually.
- Optimized extrusion and compounding efficiency by reducing cycle times and improving first-pass yield to 95% through strict BOM adherence, real-time process monitoring, and energy consumption control per ton produced.
- Ensured batch-to-batch consistency and drop-in processing reliability by implementing in-process quality controls on melt flow index, tensile strength, and compostability, reducing off-spec output by 30%.
- Improved operational reliability by enforcing preventive maintenance schedules achieving >90% machine uptime, reducing MTTR by 25%, and leading Kaizen initiatives lowering per-kg production cost by 15%.

Cimpex Packaging India Pvt Ltd

September 2020 – April 2025

GM – Operations

Vadodara, India

- Lead end-to-end manufacturing operations across blow moulding, injection moulding, and stretch blow moulding processes, improving production efficiency by 20% through process optimization and capacity planning.
- Drive new product and mould development by applying technical expertise in material selection and manufacturing techniques, accelerating product development cycles by 15%.
- Oversee production planning, raw material coordination, and inventory control, ensuring uninterrupted operations and reducing material shortages by 18%.
- Implement quality systems, internal audits, and compliance frameworks, reducing defects and customer complaints by 12% while ensuring regulatory adherence.
- Manage cross-functional teams across production, stores, and quality, enhancing operational efficiency and achieving improved profitability by 10% through process standardization and continuous improvement initiatives.

Saraswati Plastotech India Pvt Ltd

March 2015 – September 2020

AFM – Operations

Jammu, India

- Managed blow moulding and injection moulding production planning and control, increasing line utilization by 15% through structured scheduling and process optimization.
- Led vendor audits, raw material planning and UN certification trials, ensuring regulatory compliance and quality consistency.
- Improved inspection systems and corrective action processes, reducing market complaints by 18%.

Packaging Film Plant – AMUL (GCOMMFL)

February 2012 – March 2015

Plastics Engineer

India

- Oversaw extrusion film operations, improving output stability and reducing material wastage by 10%.
- Standardized machine parameters and quality checks to enhance product consistency and minimize downtime.

Arrowplast GmbH

February 2011 – February 2012

Plastics Engineer

Germany

- Supported injection and blow moulding process optimization within German manufacturing environment, ensuring adherence to EU quality standards.
- Applied structured quality inspection and material validation protocols to strengthen process reliability.

Saraswati Plastotech India Pvt Ltd

February 2010 – January 2011

Assistant Manager – QA/QC

Jammu, India

- Directed laboratory testing and inspection systems, improving defect detection accuracy by 12%.
- Strengthened internal quality controls by implementing corrective and preventive action procedures.

Dirco Polymer Private Limited

July 2008 – February 2010

Assistant Manager – Operations

Delhi, India

- Supervised polymer production operations, optimizing machine utilization and reducing rework by 10% through improved process controls.

Projects

- Project Coordinator, Biodegradable PBAT and Starch Nanocomposite Development, CIPET Chennai. Led research on polymer and clay nanocomposite processing using twin screw melt blending techniques.
- Poly Butylene Adipate co Terephthalate and Starch Biodegradable Nanocomposites, CIPET Corporate Chennai. Conducted material characterization studies evaluating mechanical, thermal and morphological properties.

Education

CIPET

2008

Master of Technology in Plastic Engineering

Bhubaneswar, India

CSJM University

2006

Master of Science in Industrial Chemistry

Kanpur, India

Publications & Conferences

- Biodegradable PBAT Nanocomposite from Organically Modified Layered Silicate, International Conference and Exhibition on Reinforced Plastics (ICERP), Mumbai
- Effect of Clay Modification on Biodegradability, Morphology, Thermal and Mechanical Properties of LDPE Thermoplastic Starch Nanocomposites, INCCOM-6 Conference, IIT Kanpur
- Preparation and Characterization of EVA and Thermoplastic Starch Blend Nanocomposites, Polychar-16 Conference, Lucknow

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Proficiency (B1)
