Dear Hiring Manager,

I am writing to express my interest in **Full Stack Developer** opportunities within your organization. With over 5 years of experience in designing and developing scalable web applications, I bring strong expertise in Angular, Python, and cloud-based systems, along with a proven ability to deliver reliable, production-ready solutions across enterprise environments.

In my current role at **Tata Consultancy Services in Germany**, I work as an Application Transition and Support Engineer, where I lead application transitions and ensure operational continuity for complex insurance platforms. I handle L3 production issues, perform root cause analysis, and implement monitoring solutions using Grafana and Kibana, significantly improving system stability and reducing recovery time. I also contribute to enhancing application security through vulnerability remediation and compliance-driven fixes.

Previously, I worked as a **Senior Full Stack Developer on an IoT platform**, where I designed and developed end-to-end web applications using Angular and Python. I built RESTful APIs using Flask to process large-scale telemetry data and implemented secure access controls for multi-tenant environments. My work also involved optimizing backend performance and data processing pipelines, improving system responsiveness and scalability.

Earlier in my career, I contributed to large-scale e-commerce platforms, developing core functionalities such as cart and checkout systems using Oracle ATG and Angular. I also gained strong experience in production support, monitoring, and release management, building a solid foundation in system reliability and operational excellence.

I am particularly motivated to continue my career in Germany, where I can contribute to organizations building scalable and high-performance digital systems. With my combined experience in full stack development, production support, and cloud-based architectures, I am confident in my ability to deliver impactful solutions and support business-critical applications.

I would welcome the opportunity to further discuss how my experience and technical skills can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Surendhran Thangaraj
