

SURENDRAN THANGARAJ

Heilbronn, Baden-Württemberg, Germany

☎ +49 15510 422595 ✉ thangarajsurendhran@gmail.com  [Surendhran Thangaraj](#)

Summary

Full stack developer with 5+ years of experience building scalable web and e-commerce applications using Angular, Python, and cloud platforms. Strong expertise in frontend development, backend APIs, and data processing for high-volume systems. Proven ability to design user-focused interfaces, integrate distributed systems, and optimize performance. Experienced in IoT, e-commerce, and enterprise platforms with strong focus on production-ready solutions and system reliability.

Core Skills

- **Programming Languages:** Python, Node JS
- **Frameworks & Libraries:** Flask, Angular, Oracle E-commerce
- **Data & Analytics:** Pandas, NumPy, Plotly
- **Cloud & Platforms:** AWS
- **Databases:** Oracle DB, MongoDB
- **Tools & IDEs:** GitLab, Jenkins, Grafana, Splunk, Eclipse, Visual Studio Code, Jupyter Notebook

Experience

Tata Consultancy Services

June 2023 – Present

Application Transition & Support Engineer (Insurance)

Heilbronn, Germany

- Lead application transition by analyzing system architecture, technology stack (Node JS, Java), and deployment pipelines to ensure seamless knowledge transfer and operational continuity.
- Resolve complex L3 production issues across backend systems and integrations, improving system stability by 30% through code-level fixes and configuration optimization.
- Implement observability solutions using Grafana and Kibana dashboards to enhance monitoring and reduce mean time to recovery (MTTR) by 25%.
- Execute security remediation tasks including CSP fixes, vulnerability mitigation, and compliance patching to strengthen application security posture.
- Handle P1/P2 incidents and perform root cause analysis, delivering permanent fixes and maintaining SLA adherence across critical systems.

Tata Consultancy Services

June 2018 – March 2023

Senior Full Stack Developer (IoT Platform)

Chennai, India

- Design and develop full-stack IoT web application using Angular and Python to visualize real-time and historical device performance data.
- Build RESTful APIs using Flask to process and serve large-scale telemetry datasets, enabling efficient data access and reporting.
- Process and transform large datasets using Python and Pandas to improve analytics and visualization capabilities.
- Optimize application performance using NGINX configuration and backend improvements, reducing response time by 20%.
- Collaborate with hardware and data engineering teams to align application features with real-world IoT device data and business use cases.

Tata Consultancy Services

January 2016 – May 2018

Full Stack Developer (E-commerce Platform)

Chennai, India

- Develop core e-commerce functionalities including cart, checkout, and order processing using Oracle ATG Web Commerce framework.
- Implement and customize commerce pipelines and form handlers to support dynamic transaction workflows and order management.
- Build responsive frontend components using Angular and integrate REST APIs to enable real-time product and cart updates.
- Enhance application performance by optimizing UI responsiveness and reducing page load time by 15%.
- Collaborate with cross-functional teams to deliver scalable and high-performance e-commerce solutions.

Wipro Technologies

September 2011 – January 2016

Project Engineer (E-commerce Support)

Chennai, India

- Provide production support for high-traffic e-commerce applications, handling incident management, client communication, and escalation processes.
- Monitor system health, batch jobs, and server performance to ensure system availability and stability.
- Automate routine health checks and improve issue detection using monitoring tools such as Splunk and Gomez, reducing manual effort by 20%.
- Deploy application updates and support release activities with minimal downtime in production environments.

Education

Vellore Institute of Technology (VIT)

June 2006 – May 2011

Master of Science in Software Engineering

Tamil Nadu, India

Certifications

- AWS Certified Solutions Architect – Amazon Web Services (AWS)

Awards & Honors

- Technical Lead for project recognized as one of the Best New Products (2019) – Consulting Specifying Engineer Magazine
- Project recognized in Manufacturing Leadership 100 Awards (2017) – Frost & Sullivan

Languages

- English – Full Professional Proficiency (C1)
- German – Basic Proficiency (A2)
