Summary

Data Engineer with 10+ years of experience building scalable data pipelines and data warehouse solutions in the healthcare domain. Strong expertise in ETL processes, SQL-based data modeling, and large-scale clinical and claims data processing. Proven ability to optimize query performance, ensure regulatory compliance, and enable analytics for business and clinical decision making. Experienced in cross-functional collaboration, stakeholder alignment, and delivery of secure and high-performance data systems.

Core Skills

- **Database Technologies:** Oracle, SQL
- **Analytics & Business Intelligence:** Data Visualization, BI Dashboards, Predictive Analytics
- **Data Governance & Compliance:** HIPAA Compliance, Data Security, Data Privacy
- **Tools & Collaboration:** Jira, Confluence
- **Data Engineering & Warehousing:** ETL Pipelines, Data Warehousing, Data Modeling, SQL
- **Cloud & Platforms:** Microsoft Azure Fundamentals
- **Practices & Methodologies:** Agile, Stakeholder Communication, Cross-functional Collaboration, Functional Teamwork

Experience

Merative Technologies

August 2024 – Present

Data Engineer

India

- Design and maintain ETL pipelines processing healthcare datasets including patient records, claims, and clinical data from multiple sources.
- Implement HIPAA-compliant data storage solutions ensuring data security, privacy, and regulatory adherence across systems.
- Optimize data warehouse queries using indexing and query tuning reducing reporting latency by 40%.
- Collaborate with data science teams to deliver structured datasets enabling predictive models for patient readmission risk.
- Improve data processing workflows enhancing pipeline efficiency and reliability by 20%.

IBM Consulting

January 2017 – July 2024

Data Management Consultant

India

- Gather business requirements and translate them into data models supporting population health analytics across government and commercial healthcare programs.
- Apply advanced analytics techniques to identify high-risk population segments improving healthcare insights and decision-making.
- Develop BI dashboards for clinical and operational KPIs enhancing visibility for leadership teams and stakeholders.
- Partner with compliance teams ensuring adherence to healthcare regulations and data governance standards.
- Enhance reporting processes and data accessibility improving operational efficiency by 25%.

Truven Health Analytics (IBM)

June 2012 – December 2016

Data Management Associate

India

- Manage data operations for 15+ US state government healthcare clients ensuring data accuracy and timely delivery.
- Administer and monitor databases proactively resolving performance issues and maintaining system stability.
- Lead issue resolution and support activities improving system reliability and reducing downtime by 20%.
- Mentor teams and coordinate resolution workflows enhancing delivery efficiency and knowledge sharing.

Education

Gojan School of Business & Technology

June 2007 – April 2011

Bachelor of Technology (GPA: 7.5)

India

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1, Learning)
