Dear Hiring Manager,

I am writing to express my interest in **Project Controls or Project Controller** opportunities within your organization. With 8 years of experience in cost management, project controls, and financial governance across large infrastructure and EPC programs, I bring strong expertise in earned value management, financial forecasting, and project performance analysis within complex multi-stakeholder environments.

In my current role at **Jacobs Solutions**, I manage **cost control activities across a portfolio of more than thirty infrastructure and EPC projects in the West Central United States region**. My responsibilities include establishing cost breakdown structures, implementing cost tracking and forecasting frameworks, and preparing monthly financial performance reports and Estimate-to-Complete forecasts for senior leadership. Through structured reporting and earned value analysis, I help project teams maintain financial discipline and improve visibility into project performance across multiple sites.

Previously at **Larsen & Toubro**, I worked as a **Senior Engineer** in project controls supporting **large infrastructure projects including metro, bridge, dam, and nuclear programs valued up to \$315 million**. I collaborated closely with project directors, planning teams, and commercial departments to align cost baselines with project schedules and change management processes. My responsibilities also included claims management, delay analysis, and administration of FIDIC-based contracts, ensuring compliance with contractual conditions and supporting resolution of project risks.

Earlier in my career, I developed strong foundational experience in quantity surveying and construction cost estimation, performing quantity take-offs, preparing Bills of Materials, and supporting project billing and financial reconciliation processes. This experience has given me a comprehensive understanding of the full project lifecycle—from cost estimation and planning through execution and financial closeout.

I hold a Postgraduate Diploma in Quantity Surveying and Contracts Management from NICMAR and a Bachelor's degree in Civil Engineering. In addition, I am a **certified Project Management Professional (PMP)** and have advanced training in Primavera P6, cost estimation, and project controls analytics. My technical expertise in tools such as **Primavera P6, EcoSys, SAP PS, Power BI, and advanced Excel** supports effective project reporting and financial analysis.

Germany's strong infrastructure sector and emphasis on engineering excellence strongly align with my professional interests. With my background in project financial governance, contract administration, and cost control across large-scale infrastructure programs, I am confident in my ability to contribute effectively to complex engineering and construction projects.

Thank you for considering my application. I would welcome the opportunity to discuss how my project controls and cost management experience could contribute to your organization.

Sincerely,

Ande Sandeep Kumar
