

AKSHAY KUMAR G K

Bengaluru, India (Open to relocate to Germany)

📞 +91 6364210743 ✉ akshaygk86@gmail.com  [Akshay Kumar G K](#)

Summary

Senior Software Engineer and Technical Leader with 13+ years of experience designing scalable enterprise applications and distributed systems using .NET Core, C#, React, and Microsoft Azure. Expert in microservices architecture, event driven systems, REST API development, and cloud native platform engineering for highly available enterprise environments. Strong background in system architecture, performance optimization, and DevOps practices including CI/CD automation and cloud delivery pipelines. Expanding expertise in Artificial Intelligence, Machine Learning, Python, Natural Language Processing, and LLM based application development for intelligent cloud platforms.

Core Skills

- **Programming Languages:** C#, JavaScript, Python (learning)
- **Frameworks & Development:** .NET Core, ASP.NET Core, React, Entity Framework Core, Dapper
- **Cloud, DevOps & Observability:** Microsoft Azure, AWS, Azure Functions, Azure Service Bus, Azure API Gateway, Cosmos DB, Blob Storage, Key Vault, Azure DevOps, CI/CD Pipelines, Git, Azure TFS, Build Automation, Azure Monitor, Application Insights
- **Architecture & System Design:** Microservices Architecture, Distributed Systems, Event-Driven Architecture, Scalability, Clean Architecture, SOLID Principles, Software Architecture Design, System Migration
- **Databases, AI & Practices:** SQL Server, MySQL, DB2, Cosmos DB, Machine Learning, NLP, LLM Applications, Generative AI, Agile (Scrum), Cross-Functional Team Leadership

Experience

EssilorLuxottica

July 2022 – Present

Senior Software Engineer

Bengaluru, India

- Designed and implemented 10+ cloud-native microservices using .NET Core and Azure cloud services to improve application scalability and deployment flexibility across distributed enterprise platforms.
- Developed REST APIs and integrated Azure Service Bus messaging to enable asynchronous communication and reliable data processing across microservice-based systems.
- Built serverless applications using Azure Functions and API Gateway by migrating legacy APIs to cloud-native services supporting scalable distributed workloads.
- Implemented CI/CD pipelines using Azure DevOps and introduced monitoring with Azure Monitor and Application Insights reducing manual deployment effort by 60% and improving system observability.
- Optimized SQL queries and database access patterns improving application response latency by 70% across critical enterprise services.

Cognizant

April 2018 – July 2022

Senior Software Developer / Technical Lead

Bengaluru, India

- Led migration of legacy enterprise applications to service-oriented and microservices architecture improving scalability and maintainability of backend systems.
- Designed and developed scalable backend APIs supporting high-volume enterprise transactions using .NET based distributed application architecture.
- Collaborated with architecture and performance engineering teams to optimize system throughput and improve application reliability in production environments.
- Managed end-to-end software delivery including system design, development, testing, deployment, and production support across cross-functional engineering teams.

IBM

January 2015 – April 2018

Software Developer

Bengaluru, India

- Developed enterprise applications using modular architecture patterns translating business requirements into scalable and maintainable software solutions.
- Collaborated with business stakeholders to gather functional requirements and convert them into structured system specifications and technical design artifacts.
- Evaluated software architecture options during system modernization and migration initiatives supporting enterprise application transformation programs.

Crystal Info Systems

August 2012 – August 2014

Senior Software Engineer

Bengaluru, India

- Developed enterprise software enhancements improving application reliability, performance, and maintainability across production systems.
- Designed and implemented reporting solutions using SQL Server Reporting Services to support operational analytics and business reporting requirements.
- Collaborated with cross-functional teams to troubleshoot production issues and deliver system improvements for enterprise software platforms.

Key Project

- Designed an automated failure detection system that generates helpdesk tickets when application failures occur by mining application logs, attaching diagnostic data, capturing screenshots, and triggering notifications to accelerate incident resolution.

Education

VTU

November 2010

Bachelor of Engineering in Information Science

Bengaluru, India

Certifications

- Windows and Web Application Development using .NET Framework – NIIT, January 2011
- Executive Post Graduate Certification in Data Science & Artificial Intelligence – iHUB DivyaSampark, IIT Roorkee (In Progress)
- Microsoft Certified: Azure AI Fundamentals (AI-900) – Microsoft
- Microsoft Azure AI Engineer Associate (AI-102) – Training / Certification Preparation
- Python Programming for Data Science – Training

Accomplishments

- Achieved 1st, 2nd, and 3rd place finishes in a client-focused Hackathon conducted by Cognizant – July 2019 (Secured 3 out of the top 5 positions for innovative solutions and technical excellence)

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
