Dear Hiring Manager,

I am writing to express my interest in a **Production Engineer** position within your organization. With over five years of experience in heavy fabrication and manufacturing operations, I bring strong expertise in CNC plasma cutting, production planning, quality control, and shop floor supervision within structural and earth moving equipment manufacturing environments.

In my current role as **Senior Production Engineer at Raizan Steel Engineering Pvt Ltd**, I lead end to end fabrication operations for structural components and gear case housings. My responsibilities include translating technical drawings into optimized CNC nesting programs, planning raw materials, supervising fabrication teams, and ensuring compliance with customer quality standards. Through structured production scheduling and process optimization, I have contributed to improved on time delivery, reduced material scrap, and strengthened first pass manufacturing quality.

Previously, as **Production and Quality Supervisor**, I managed CNC plasma operations, technical drafting, welding inspection processes, and quality documentation including FMEA, Control Plans, SOPs, and CAPA frameworks. I consistently supported continuous improvement initiatives by resolving shop floor technical challenges and enhancing manufacturing efficiency while maintaining strict adherence to dimensional and inspection requirements.

I am particularly motivated to contribute to manufacturing organizations in Germany that value precision engineering, process discipline, and continuous improvement. With a strong foundation in fabrication technologies, quality assurance systems, and production coordination, I am confident in my ability to support efficient, compliant, and high quality manufacturing operations.

I would welcome the opportunity to further discuss how my technical and operational experience can contribute to your production team. Thank you for your time and consideration.

Yours sincerely,

Saifalikhan Umarkhan
