Dear Hiring Manager,

I am writing to express my interest in a **Dynamics 365 Functional Consultant** role within your organization. With over 10 years of experience delivering ERP implementations and global production support across Supply Chain, Trade and Logistics, Procurement, and Sales modules, I bring strong expertise in Microsoft Dynamics 365 Finance and Operations and AX 2012 environments.

Throughout my career with **Cognizant, Tata Consultancy Services, Accenture, and Sonata Software**, I have led configuration, customization, and support initiatives for enterprise clients across global markets. My experience includes gap analysis, functional design documentation, ATP and PIPO customizations, regression testing, incident management, and SLA-driven production support. I have consistently improved system stability, enhanced order fulfillment visibility, and reduced recurring incidents through structured root cause analysis and stakeholder collaboration.

I have extensive experience conducting functional workshops, preparing FDD documentation, supporting UAT cycles, and training business users to ensure smooth go-live transitions and high system adoption. My background in procurement operations at IBM further strengthens my understanding of real-world supply chain processes and cross-functional integration.

I am particularly motivated to contribute to organizations in Germany that value structured ERP governance, process optimization, and global system harmonization. With Microsoft certifications including MB-300 and MB-330, and working proficiency in German, I am prepared to integrate quickly into cross-cultural teams and deliver measurable business impact.

I would welcome the opportunity to discuss how my Dynamics 365 expertise and supply chain domain experience can support your digital transformation initiatives. Thank you for your time and consideration.

Yours sincerely,
Ruman Ahmed N
