Summary

Dynamics 365 and AX Functional Consultant with 10+ years of experience delivering ERP implementations and global support across Supply Chain, Trade and Logistics, Procurement and Sales modules. Expert in D365 Finance and Operations, AX 2012, gap analysis, functional design documentation, testing and stakeholder collaboration. Strong record of driving SLA adherence and resolving enterprise incidents.

Core Skills

- **ERP & Supply Chain Systems:** Microsoft D365 Finance and Operations, MS Dynamics AX 2012 R3, MS Dynamics AX 2009 Trade and Logistics Modules, SAP Ariba
- **Procurement & Operations:** Procurement and Purchasing, Purchase Order Audit Support, Customer Oriented Service Delivery
- **Platforms & Tools:** Windows Operating Systems, Microsoft Office Word and Excel
- **Professional Competencies:** Excellent Oral and Written Communication, Team Collaboration, Deadline Management, Goal Oriented Execution
- **Technical & Engineering Foundations:** C Programming, Digital Electronics, Verilog, VHDL, RF Spectrum Analyzer with Auto Tapping System, Energy Efficient Routing in Wireless Sensor Network

Experience

Cognizant

May 2024 – Present

Senior Associate

India

- Lead configuration of Sales and Marketing and Product Information Management modules in global D365 implementation, aligning system design with client business processes.
- Designed and configured ATP and PIPO customizations improving order fulfillment visibility by 20%.
- Delivered pricing management configurations and customized reports to meet enterprise reporting requirements.
- Developed user manuals and conducted functional training sessions achieving 95% business user adoption during UAT and go live phases.

Tata Consultancy Services

November 2022 – May 2024

Assistant Consultant

India

- Resolved supply chain and trade related incidents in AX 2012 and D365 environments maintaining 98% SLA compliance.
- Performed regression testing and batch monitoring activities to ensure release stability and prevent production disruptions.
- Collaborated with global stakeholders to analyze root causes and reduce recurring tickets by 15%.

Accenture

February 2021 – November 2022

Application Development Senior Analyst – D365 Support

India

- Managed PIM, Inventory, Warehouse, and Sales module incidents across D365 and WSA integration environments.
- Improved ticket resolution turnaround time by 18% through structured issue triaging and stakeholder coordination.
- Supported cross system integration workflows ensuring data consistency between D365 and external applications.

Sonata Software

September 2019 – February 2021

Senior System Analyst

India

- Handled Procurement, Production Control, Inventory, Warehouse, Asset Management and Trade and Logistics issues across multiple global customers.
- Maintained SLA adherence above 97% by prioritizing critical supply chain incidents.
- Collaborated directly with enterprise clients to troubleshoot functional gaps and deliver stable solutions.

- Led implementation and support of Trade and Logistics and Procurement modules conducting gap analysis and functional workshops.
- Prepared Functional Design Documents and enhancement specifications translating business requirements into system configurations.
- Improved process efficiency by 20% through workflow optimization and solution redesign for enterprise clients.
- Supported end user training and UAT cycles ensuring successful solution acceptance.

IBM**June 2014 – February 2016***Senior Procurement Specialist**India*

- Managed purchase requisition and invoice workflows in Ariba ensuring timely processing and compliance with client SLAs.
- Reduced blocked invoice backlog by 25% through coordination with accounts payable and IT teams.
- Collaborated with suppliers and internal stakeholders to resolve procurement discrepancies and improve cycle time by 15%.

Projects

- Birla Furukawa Ltd – Microsoft Dynamics AX 2012 Implementation and Support. Delivered configuration, customization, and post go live support for Procurement and Sourcing and Trade and Logistics modules, improving supply chain process efficiency and strengthening transactional accuracy.
- Energy Efficient Routing in Wireless Sensor Network – M.Tech Project. Designed and implemented a hybrid energy efficient and hierarchical routing algorithm for wireless sensor networks, reducing power consumption and extending sensor node lifetime.
- RF Spectrum Analyzer with Auto Tapping System – B.E Project. Developed an automated RF monitoring system to detect unauthorized spectrum utilization, improving signal detection accuracy and enabling controlled spectrum analysis for security applications.

Education

The Oxford College of Engineering**2011 - 2013***Master of Technology in Digital Electronics and Communication**India***K.S. Institute of Technology****2010***Bachelor of Engineering in Telecommunication**India***Christ PU College****2006***PUC**India***Certifications**
