

CHARLES HERBERT MATOVU

Kuala Lumpur Malaysia | +60 1125391283 | charlesherbertmatovu@gmail.com

Professional Summary

Results-focused Data Scientist and Software Engineer with 12+ years of experience in data governance, workflow automation, and cloud-based systems. Skilled in designing and implementing scalable solutions using Python, SQL, Power Platform, Power BI, and AWS. Proven track record in enhancing data accuracy, system efficiency, and decision-making through advanced analytics, ETL pipelines, and real-time dashboards. Adept at leading digital transformation projects across international organizations, with a strong foundation in sustainability and energy analytics.

Skills

- **Programming & Tools:** Python, R, SQL/MySQL, Power BI, Power Apps, Power Automate, Tableau, API Integration
- **Data & Cloud:** AWS, Databricks, Data Modeling, ETL Pipelines, Geospatial Analysis (GIS)
- **Platforms & Systems:** SharePoint, Microsoft 365, Dynamics, Linux Server Management, Web & Software Development
- **Frameworks & Practices:** ITIL, GDPR Compliance, System Administration, Project Management

Work Experience

Assoc Information Management Officer 03/2022 to Current

UNHCR Malaysia – Kuala Lumpur, Malaysia

- Led the migration of organizational datasets to AWS using Dynamics and Power Platform, enhancing cloud collaboration efficiency.
- Developed Power Apps solutions (e.g., Leave Management Tool), reducing HR processing time by over 15 hours per month.
- Administered system permissions and access controls to secure document sharing and mitigate unauthorized access.
- Enhanced data integrity and reduced discrepancies by 35% through SQL-based data cleanup and R-powered analytics.
- Delivered GDPR and Microsoft 365 training sessions to staff, improving compliance and operational proficiency.
- Applied AI-driven analytics to construct a multiyear strategic plan, using predictive models to align with long-term business goals.

Asst Information Management Officer 04/2017 to 03/2022

UNHCR Uganda – Kampala, Uganda

- Designed a real-time monitoring dashboard in Power BI, integrating SharePoint list data to support program tracking.
- Defined system requirements in collaboration with IT teams for new implementations and upgrades.
- Automated data collection workflows using Power Automate, cutting manual input by 25%.
- Authored user guides and standard operating procedures to support SharePoint and Power BI adoption.
- Engineered a Python-based ETL pipeline to consolidate multi-source datasets and visualized insights in Power BI, improving reporting accuracy and decision efficiency.

- Engineered 10+ business process automation solutions (e.g., Property Registration System) using SQL, GIS, and Power Apps, increasing operational efficiency by 40%.
- Maintained Linux servers and managed cloud infrastructure to ensure high availability and reliability of enterprise applications.
- Fostered collaborative relationships with internal and external stakeholders to support technical alignment and solution delivery.

Project

AWS Migration Automation | Python, AWS

Automated infrastructure provisioning for UNHCR's website migration, reducing manual setup time by 60%.

Property Registration System | SQL/MySQL, GIS

Engineered a city-wide property registration system for Kampala Capital City Authority, improving data transparency and cutting processing time by 40%.

Leave Management Tool | Power Apps, Power BI

Developed an internal application to streamline HR workflows, saving over 15 hours per month.
