Dear Hiring Manager,

I am writing to express my interest in **automotive operations, procurement, or service coordination** opportunities within your organization. With over five years of experience in the automotive service and aftermarket ecosystem, I have developed strong expertise in vehicle service coordination, parts evaluation, workshop operations, and customer-focused service delivery across multi-city operations.

In my current role at **LKQ India Pvt Ltd.**, I work within the **salvage procurement team** where I **evaluate incoming vehicles to identify reusable and high-value automotive components**. My responsibilities include conducting vehicle inventory inspections, identifying OEM and aftermarket parts, documenting procurement insights, and maintaining detailed records across internal systems. This role requires strong technical understanding of automotive components as well as close collaboration with procurement and operations teams to ensure efficient salvage procurement processes.

Previously at **GoMechanic**, I managed **customer service operations across Bangalore, Mysore, and Kochi** while coordinating repair workflows across multiple partner workshops within a luxury vehicle service network. I oversaw the entire repair lifecycle—from service estimation and approvals to scheduling, billing, and post-service feedback—ensuring efficient coordination between customers, service advisors, and workshop technicians. Through structured communication and operational oversight, I supported thousands of vehicle service cases while maintaining high customer satisfaction levels.

Earlier in my career, I worked as a **Service Advisor at Sapphire Honda** where I coordinated workshop activities, managed service documentation, and facilitated communication between technicians and customers. This role helped me build a strong foundation in workshop operations, service workflows, and customer-facing automotive service processes.

I am particularly interested in opportunities in Germany, where the automotive industry sets global standards for engineering, operational excellence, and supply chain efficiency. With my background in automotive service coordination, parts identification, and procurement support, I am confident that I can contribute effectively to operational and technical teams within the automotive ecosystem.

Thank you for considering my application. I would welcome the opportunity to further discuss how my experience and skills align with your organization's needs.

Sincerely,

Tharun C M
