Experience

LKQ India Pvt Ltd

September 2023 – Present

Procurement Engineer — Salvage Procurement Team

Bangalore, India

- Conduct vehicle inventory inspections to identify reusable and high-value automotive parts by evaluating salvage vehicles and documenting parts availability for procurement decisions.
- Maintain detailed product knowledge of automotive aftermarket and OEM replacement components to support accurate part identification and procurement evaluation.
- Create and maintain procurement and inventory reports using internal LKQ platforms to ensure accurate tracking of vehicle parts and procurement records.
- Collaborate with cross-functional stakeholders across procurement and operations teams to ensure consistent reporting and efficient salvage procurement workflows.
- Support salvage procurement activities by documenting vehicle inventory insights and maintaining structured records for vehicle part evaluations across incoming salvage units.

Go Mechanic

February 2022 – September 2023

Customer Relationship Manager

Bangalore, India

- Managed customer service operations across Bangalore, Mysore, and Kochi by coordinating repair workflows across 15 partner workshops within the luxury vehicle service network.
- Coordinated vehicle repair lifecycle including service estimation, approval, scheduling, billing, and post-service feedback to ensure smooth repair operations.
- Assigned customer leads to workshops and monitored repair progress to ensure timely service completion and operational transparency.
- Maintained communication with customers throughout the repair lifecycle to improve service experience and support customer satisfaction outcomes.
- Supported service operations for 3000 luxury vehicle repair and maintenance services by coordinating workshop activities and customer service processes.

Saphire Honda

June 2016

Service Advisor

Bangalore, India

- Prepared daily service work orders and scheduled repair appointments for two-wheeler customers to ensure organized workshop operations.
- Maintained detailed documentation of ongoing vehicle repairs and future service recommendations to support accurate service history records.
- Coordinated communication between service technicians and customers to ensure transparency in repair timelines and service updates.
- Supported service center workflow by tracking customer repair requests and maintaining accurate service documentation.
