Dear Hiring Manager,

I am writing to express my interest in a **Senior Business Intelligence or Analytics leadership** position within your organization. With over 13 years of experience across banking, financial services, and global technology environments, I bring strong expertise in enterprise analytics, data modeling, and executive dashboard development that supports risk, revenue, and operational decision making.

In my recent role as **Analytic Consultant AVP at Wells Fargo**, I led enterprise business intelligence initiatives within Wealth and Investment Management Risk. I designed automated Power BI dashboards, developed SQL-driven ETL pipelines, and built advanced DAX data models that significantly reduced manual reporting effort while strengthening data governance and reporting accuracy. My work focused on translating complex regulatory and business requirements into scalable analytics solutions aligned with compliance and operational controls.

Previously at **Capgemini and ITC Infotech**, I delivered multi-region sales and finance analytics platforms integrating Salesforce and enterprise datasets. I built KPI frameworks for forecast variance, revenue tracking, and performance management, enabling leadership teams across Europe and the US to make data-driven decisions with greater transparency and efficiency. Across roles, I have consistently partnered with cross-functional stakeholders to standardize metrics, improve automation, and enhance reporting performance.

I am particularly motivated to contribute to organizations in Germany that value structured governance, data quality, and analytics-driven transformation. With strong technical capabilities in Power BI, SQL, Python, and advanced analytics tools, combined with financial domain expertise and global stakeholder collaboration experience, I am confident in my ability to deliver scalable, compliant, and high-impact business intelligence solutions.

I welcome the opportunity to further discuss how my experience can support your analytics and data transformation objectives. Thank you for your time and consideration.

Yours sincerely,

Madhusree Das
