Dear Hiring Manager,

I am writing to express my interest in the role of Service Delivery / IT Operations / Project Management. With over 16 years of experience driving ITIL-based service governance across complex, global, multi-vendor environments, I bring a record of ensuring high service availability, operational excellence, and measurable delivery improvements. My background in sustaining 99.99% uptime, reducing escalations by 50%, and improving resolution efficiency by 10% demonstrates my ability to transform operations while maintaining a customer-centric approach.

Across Capgemini, Epsilon, Mphasis, IBM, and Cognizant, I have led end-to-end delivery initiatives spanning incident, problem, and change management; capacity planning; SLA/OLA governance; service transition; and stakeholder management (EU/USA/APAC). I've built and scaled Delivery Excellence playbooks, KPI packs, runbooks, compliance controls, and onboarding kits — enabling predictable operations, faster stabilization, and audit-ready processes. My leadership style combines data-backed decision-making with hands-on technical and managerial engagement to ensure seamless collaboration across cross-functional and vendor teams.

I am PMP, CSM, and ITIL v4 certified, and proficient with Jira, ServiceNow, MS Project Planner, Remedy, and Agile delivery frameworks. I thrive in roles that require simplifying complexity, building operational rigor, and driving continuous improvement across teams. I am confident that my blend of project delivery expertise, ITSM operations depth, and strong stakeholder engagement would be an asset to your organization.

I would welcome the opportunity to contribute to a culture of service excellence, operational stability, and business value creation. Thank you for considering my application. I look forward to the possibility of discussing how my background aligns with your goals.

Sincerely,
Poonacha M B
