Subject: Application for Senior Manager – QA/QC & Regulatory Affairs (Open to Relocate to Germany)

Dear Hiring Manager,

I am writing to express my interest in a Senior Manager – Quality Assurance, Quality Control, or Regulatory Affairs position in Germany. With over 14 years of comprehensive experience across pharmaceutical, cosmetic, food, and nutraceutical industries, I bring a unique blend of regulatory expertise, R&D innovation, and leadership in ISO 9001:2015-compliant systems. My career reflects a consistent record of ensuring product excellence, regulatory compliance, and operational efficiency across global markets.

In my current role as Senior Manager – QAQC & Regulatory Affairs at Sri Sri Tattva Pvt. Ltd., I lead end-to-end quality and compliance functions covering pharma, food, and cosmetic formulations. I oversee regulatory submissions for domestic and export markets (Europe, USA, Canada, and APAC), implement GMP-aligned audits, and manage certifications such as AYUSH GMP, HACCP, FSSAI, Ecocert, and USDA-NOP. My initiatives in Root Cause Analysis (RCA), CAPA, and process standardization have strengthened product reliability and customer satisfaction across diverse product portfolios.

Previously, at Cholayil Pvt. Ltd., I served as a Research Scientist in Regulatory Affairs, driving successful new product licensing with CDSCO and international clients. I established data governance frameworks and enhanced artwork management systems (AWMS) for compliance under Legal Metrology and IFRA standards. As Principal Scientist at KP Manish Global Ingredients, I led the development of active ingredients from lab to commercial scale, optimizing sourcing and production through quality audits and supplier evaluations.

My early career with The Himalaya Drug Company laid the foundation for deep expertise in formulation, technology transfer, and regulatory documentation. I contributed to a broad portfolio of herbal and pharmaceutical innovations while ensuring seamless coordination between R&D, analytical, and regulatory teams.

I hold a Doctorate (Ph.D.) and M.Pharm degree in Pharmaceutical Sciences, supported by ISO 9001:2015 auditor training and extensive exposure to global regulatory guidelines (GMP, cGMP, GLP, GDP, ICH, IFRA). I am fluent in English (C2) and have basic proficiency in German (A1), with an active interest in further developing my language skills for professional integration in Germany.

I am enthusiastic about contributing to Germany's globally respected life sciences sector, known for its commitment to quality, innovation, and compliance. I look forward to bringing my regulatory insight, R&D acumen, and quality leadership to your organization.

Thank you for your consideration. I would welcome the opportunity to discuss how my expertise aligns with your quality and compliance goals in Germany.

Warm regards,

Dr. T. Paul Pandi, M.Pharm., Ph.D.
