Dear Hiring Team,

I am applying for product roles in Germany, bringing 11 years of experience delivering measurable outcomes across high-scale retail and e-commerce. At Walmart Global Tech, I own the roadmap for an in-house content and fraud-moderation platform that protects review authenticity while lowering unit cost, with a projected >30% long-term cost reduction driven by robust annotation operations, clear QA guardrails, and cross-functional execution with engineering, data science, and compliance.

In prior work, I unified in-store and online reviews, increasing weekly native review volume by 4.16% and improving coverage through partner syndication. I led compliance initiatives deduplication, traceability, re-moderation and closed non-compliance with root-cause fixes and durable controls. In retail services, I built the roadmap for a multi-service appointment-scheduling platform for Auto Care Centers, defined wheel-install flows, and expanded the booking window to two weeks, raising tire-install appointments by 5.26% and enabling better capacity planning with operations.

My trajectory reflects sustained impact and pace promotion to Senior Product Manager in 15 months and a Walmart Excellence Award. Earlier roles strengthened stakeholder leadership and delivery hygiene: coaching teams, analyzing performance data to secure fidelity, and running community initiatives at scale. Core strengths include product strategy and prioritization, roadmap ownership, user-journey design, partner syndication, content integrity and moderation, and omnichannel scheduling and capacity expansion. I'm motivated to bring these capabilities to a Germany-based team building trustworthy UGC systems and scalable commerce experiences.

Thank you for your time and consideration. I look forward to discussing how these outcomes can support your roadmap in Germany.

Sincerely,
Viswanath Vaidyanathan
