Dear Hiring Manager,

I am writing to express my interest in a Pre-Sales or Solutions Engineer position within your organization. With over ten years of experience in industrial automation and technical sales, I bring a strong blend of technical depth, commercial acumen, and process discipline that consistently improves quote accuracy, customer confidence, and delivery readiness.

In my current role as Assistant Sales Manager (Technical Sales) at Karamsar Technology, I lead discovery sessions to translate customer requirements into manufacturable and commercially viable solutions. By standardizing feasibility checks, documentation templates, and validation workflows, I have improved quote accuracy by up to 15% and shortened the RFQ-to-quote cycle by 20%. I also package complete BOMs, acceptance criteria, and risk notes for clean handovers to delivery, reducing rework and post-sale clarifications.

Previously at Schindler India, I supported service sales and spares operations, coordinating with vendors and logistics teams to maintain SLA compliance and renewal retention. Across roles, I have leveraged CRM tools such as Salesforce and HubSpot to maintain forecast hygiene, ensure traceable communication, and align technical and commercial stakeholders around clear assumptions and deliverables.

Fluent in English and conversant in German (B1), I am prepared to operate effectively in cross-cultural, multinational settings. I take pride in combining structured discovery, clear documentation, and proactive stakeholder engagement to de-risk delivery and strengthen customer trust.

I would welcome the opportunity to discuss how my experience in technical pre-sales and solution scoping can contribute to your team's success.

Thank you for your time and consideration.

Sincerely,
Viswanath S
