Dear Hiring Manager,

I am a B2B marketing professional with 3 years of experience across demand generation, field marketing, email automation, and SEO content, looking to contribute to the European growth team. I partner closely with Sales and PMM to turn campaigns into a qualified pipeline, and I am comfortable operating under GDPR with disciplined reporting and Workfront driven execution.

In my recent role as a Marketing Executive at TransUnion UK, I planned and delivered integrated B2B marketing campaigns across email, web, content, and events to support brand visibility and lead generation. I managed a 15,000+ subscriber newsletter in Oracle Eloqua, overseeing segmentation, testing, deployment, and performance reporting, consistently achieving ~20% open rates and 6-8% CTR. I led end-to-end marketing communications for the TransUnion UK Summit 2025, including Cvent website management and post-event engagement campaigns that generated 20,000+ video views and 12-15% email CTR.

I am hands-on with Eloqua, HubSpot, Mailchimp, AEM/WordPress, and creative tools such as Canva and Adobe Photoshop for quick design adaptations and social assets. I am fluent in segmentation, A/B testing, lead capture, and nurture design, and practical about attribution and KPI dashboards that Sales trusts.

I would welcome the opportunity to help accelerate your EU/Germany pipeline with compliant, test-and-learn campaigns across the full funnel - from events to email to content. I am available at short notice and open to relocation.

Sincerely,

Sohini Ghosh
