Dear Hiring Manager,

I am writing to express my interest in the Mechanical/Design Engineer position at your esteemed organization in Germany. With over 4 years of experience in aerospace design engineering, I bring a proven track record in delivering high-quality design solutions for major Airbus programs, covering both commercial aircraft and helicopters. My background combines strong technical expertise in CATIA V5, PLM systems, and manufacturing documentation with hands-on experience in electrical system installation, mechanical system integration, and configuration compliance.

In my current role at Capgemini Engineering, I have executed more than 150 Configuration Item (CI) checks for Airbus A320 programs, ensuring strict compliance with Technical Repercussion Sheets (TRS) and cross-verifying across over ten PLM tools. I have also delivered multiple design modifications, including A340 sealant profile changes and A320 TOW ASA project updates. Previously at Alten, I led 80+ Digital Mock-Up integration (DMUi) activities for Airbus A350 and A320 aircraft, conducted detailed harness routing validations, and performed volumetric safety analysis for the A350 Freighter. My early career at Tech Mahindra involved preparing more than 50 visual work instructions and creating detailed Bills of Materials (BOMs) for the Airbus A220 program, directly supporting manufacturing efficiency and accuracy.

My Bachelor of Technology in Mechanical Engineering from JIS College of Engineering has provided me with a strong engineering foundation, complemented by advanced proficiency in PLM & CAD tools (Enovia VPM, Windchill, TAKSY, COBOT Suite), manufacturing documentation, and aerospace-specific processes such as wire harness installation, clash clearance analysis, and volumetric modeling. I thrive in collaborative, cross-functional environments, working effectively with engineering, production, and quality teams to ensure timely and compliant project delivery.

I am eager to bring my technical expertise and dedication to precision engineering to your organization in Germany, contributing to innovative projects that uphold the highest standards of safety, efficiency, and performance. I am confident that my background aligns well with the demands of the role, and I am committed to integrating seamlessly into your engineering processes and corporate culture.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences can contribute to your team's success.

Sincerely,
Nirupam Mondal
