Professional Summary

OSP fiber engineer with 12 years building FTTH/metro networks across India and Malaysia. Delivered 300–450 km of buildouts across trenching, ducting, splicing, and acceptance testing; cut rework 20% with tighter QC and as-built documentation. Navigated permits with municipal bodies, coordinated HDD crews and vendor teams to land launches on time. Hands-on with OTDR, fusion splicing, power meters, and acceptance test packs.

Skills

Hard Skills: FTTx/OSP design and build, Route survey and link budget basics, HDD/trenching supervision, Splicing/OTDR testing/acceptance, RoW permitting and as-builts, Quality control and audits

Tools/Tech: OTDR, Fusion Splicer, Power Meter, Power BI (dashboards, QA tracking), MS Excel, MS Project basics, GIS/AutoCAD exposure

Domains: FTTH, Metro fiber, HFC hybrid, Intracity networks, enterprise last-mile, Vendor/contractor management, Work-zone safety and compliance

Professional Experience

Engineer Intracity Fibre 10/2021 to 06/2025

Reliance Industries – Bengaluru, India

- Built 120–180 km of FTTH/metro fiber across multiple wards supervised trenching/ducting, ensured spec compliance, and closed acceptance tests on schedule.
- Spliced/terminated 1,200–1,800 fibers; ran OTDR and power-meter tests, closed punch lists, and improved first-pass acceptance to 95%.
- Cut permit turnaround 25% by sequencing drawings, bill-of-materials, and site photos for faster municipal review.
- Reduced restoration MTTR 20% by standardizing test points, splice logs, and fault-localization playbooks.
- Trained 6–10 junior engineers/techs on splicing safety, OTDR traces, and handover documentation, reduced rework 20%.
- Maintained ISO/audit-ready documentation: route maps, splice plans, link budgets, and redlines.

Engineer Intracity Fibre 05/2016 to 09/2021

Quess Corp Limited – Bengaluru, India

- Delivered 150–220 km of OSP builds across FTTH and enterprise last-mile; managed multiple vendor crews and night works.

- Engineer** 09/2015 to 03/2016

- Rolled out overhead fiber on priority routes validated link budgets and material consumption accuracy.
- Raised quality checks to prevent sheath damage and sag issues improved acceptance timelines 15%.

Fibre Optic Engineer	05/2014 to 05/2015
-----------------------------	--------------------

- Engineered hybrid HFC–fiber segments integrated coax and LWL runs to improve network reliability.
- Executed test/troubleshoot routines on hybrid nodes sustained service quality and documented procedures.

Application Specialist 01/2012 to 03/2013

Research Analyst	07/2010 to 07/2011
-------------------------	--------------------

Education

Master of Business Administration (Distance Education): International Business 12/2015

Bachelor of Technology: Biotechnology 04/2009

Anna University - Tamil Nadu, India

Certification

- Advanced Certification in Data Analytics for Business — IITM & Intellipaath - Bengaluru, India- 03/2023 – 01/2024
