Summary

Senior Data Scientist with 14+ years across BFSI, Healthcare, Manufacturing, and Energy. Builds end-to-end data products using Python, SQL, scikit learn, and PySpark on AWS. Delivers LLM RAG, forecasting, NLP, and recommender systems to production with measurable impact for EU, USA, and APAC stakeholders. Focus on clean code and business outcomes. Open to relocating to Germany.

Core Skills

- **Machine Learning:** Supervised learning, time series, NLP, recommender systems, model evaluation
- **LLMs and RAG:** LangChain, vector stores, Milvus, prompt engineering, retrieval tuning
- **Cloud and DevOps:** AWS, Docker, Kubernetes, Jenkins, CI CD
- **Data:** SQL, data modeling, feature engineering, PySpark, Hadoop, Hive, ETL
- **Backend and APIs:** Python, Flask, Django, REST, authentication, single sign on
- **Visualization:** Tableau, Apache Superset, D3.js, Matplotlib

Experience

Tata Consultancy Services

August 2021 – Present

Technical Lead Data Science

Bengaluru, India

- **Apple:** Improve internal knowledge answers and demand forecasts by building LangChain and Milvus-based RAG and time series models on Splunk logs, which lift precision by 25% and cut false capacity alarms by 30%.
- **Apple:** Optimize Kubernetes autoscaling by assessing horizontal and vertical pod signals and defining Karpenter policies that reduce overprovisioned nodes by 15%.
- **Datom:** Redesign data privacy and AI foundation modules and integrate RAG search into analytics UI, which lowers defects by 40% and lifts analyst task speed by 20%.
- **Happy Workforce:** Ship skill extraction and recommendations using NLP and PySpark, and enable single sign-on on which increases content engagement by 25% and reduces priority incidents by 30%.

UST Global

September 2018 – August 2021

Associate Data Scientist and Data Analyst

Bengaluru, India

- **NACO and QUBZ:** Accelerated BI and OLAP reporting by integrating QUBZ, Apache Kylin, and Superset, and by tuning Flask services, which improve dashboard load times by 35%.
- **NACO:** Implemented role-based access control and single sign-on and enhanced data governance, which reduces unauthorized exposure risk for public sector analytics.
- **Equifax:** Automated credit data checks in Python across the UK, USA, and Canada, and built Kibana and AppDynamics monitoring, which saves 20 hours per week and improves incident detection by 40%.
- **Equifax:** Strengthened releases with unit and system tests and improved stability for multi-region operations and data quality pipelines.

Wipro

October 2011 – September 2018

Developer and Data Analyst

Bengaluru, India and United Kingdom

- **Xoserve:** Migrated legacy datasets into the UK Link System using SQL and UNIX, and profiled 22M records, which raises data quality and delivery confidence.
- **State Street:** Delivered enterprise ETL reports and coached new joiners, which shortens ramp-up time and improves reporting reliability for banking stakeholders.
- **Holmes:** Built big data pipelines with Hive, Spark, and Sqoop for internal analytics, which improves throughput and reduces manual processing effort.

Education

Birla Institute of Technology and Science Pilani

2015

M.Tech in Software Engineering

India

Bharathiar University

2011

B.Sc. in Electronics and Communication Systems

India

Certifications

- Post Graduate Program in Big Data Analytics and Optimization | INSOFE Bangalore

Awards

- Hero of the Customer | Xoserve CEO
- Hot Spot Nominee | Tata Consultancy Services

Languages

- English - Full Professional Proficiency (C1)
- German - Intermediate Working Proficiency (B1)
